

## **Andrew Ingram**

Completed 1145 labs earning 115280 points.

### **Activity Report**

| Date       | Lab   | Description   | Points Earned |
|------------|---|---|---------------|
| 2025-02-05 | Introduction to API<br>Vulnerabilities                                | Describe an application programming interface (API)                   | 20            |
| 2025-02-04 | Security Headers:<br>Introduction to Cache-<br>Control                | Be aware of the benefits of cache-control                             | 20            |
| 2025-02-04 | Security Headers:<br>Introduction to Cookies                          | Recognize the benefits of cookies in relation to security headers     | 20            |
| 2025-02-04 | Introduction to Security<br>Headers                                   | Recognize the benefits of enabling security headers                   | 20            |
| 2025-01-30 | Zero-Day Behavior: PDF<br>Samples                                     | Analyze a PDF that contains abnormal data streams                     | 200           |
| 2025-01-29 | PowerShell Basics:<br>Demonstrate Your Skills                         | Creating and editing PowerShell scripts                               | 200           |
| 2025-01-29 | DDOS Analysis:<br>Demonstrate Your Skills                             | Understand the mechanics of a DDoS attack and how they appear in logs | 200           |
| 2025-01-29 | DDOS Analysis: UDP<br>Flood   | Understand the mechanics of UDP Flood DDoS attacks                    | 100           |
| 2025-01-29 | Incident Response:<br>Application Shimming                            | Investigate signs of persistence on a<br>Windows machine              | 200           |
| 2025-01-29 | Incident Response:<br>ZWSP Phishing<br>Vulnerability in Office<br>365 | Assemble URLs containing ZWSPs to obfuscate a malicious link          | 100           |

## **Activity Report Page 2 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2025-01-29 | Incident Response: Persistence via Accessibility Features              | Exposure to the common vectors actors will use to gain persistence on a host   | 200           |
| 2025-01-28 | FIN7 Threat Hunting with<br>Splunk: Ep.10 –<br>Demonstrate Your Skills | Understand the techniques used by the FIN7 threat group during an attack   | 300           |
| 2025-01-27 | Practical Malware<br>Analysis: Demonstrate<br>Your Skills              | Demonstrate a robust methodology for conducting malware analysis   | 300           |
| 2025-01-27 | Yara: Demonstrate Your<br>Skills                                       | Create Yara rules to tackle emerging threats   | 300           |
| 2025-01-24 | Introduction To Elastic:<br>Demonstrate Your Skills                    | Demonstrate how to use the various apps in Kibana to identify the tactics, techniques, and procedures of an advanced persistent threat group | 300           |
| 2025-01-24 | Yara: Ep.10 – Modules  | Investigate unique data related to malware samples   | 200           |
| 2025-01-23 | Introduction To Elastic:<br>Ep.8 – Act                                 | Demonstrate how to create a custom query rule in Elastic   | 200           |
| 2025-01-23 | Introduction To Elastic:<br>Ep.7 – Escalate                            | Understand the importance of using Elastic in escalating security incidents  | 100           |
| 2025-01-23 | Introduction To Elastic:<br>Ep.6 – Investigate                         | Recall the importance of using Elastic in investigating security incidents   | 100           |
| 2025-01-23 | Introduction To Elastic:<br>Ep.5 – Focus (Detection<br>Rules)          | Demonstrate how to gather further information on a pre-defined rule in Kibana  | 200           |
| 2025-01-23 | Introduction To Elastic:<br>Ep.4 – Focus (Alert<br>Detailing)          | Demonstrate how to gather further information on alerts in Kibana  | 200           |
| 2025-01-23 | Introduction to Sigma:<br>Ep.4 — Custom Field<br>Mapping               | Construct a query using a custom field mapping configuration   | 200           |
| 2025-01-23 | Introduction to Sigma:<br>Ep.5 — Demonstrate<br>Your Skills            | Demonstrate how to modify a configuration file   | 300           |
| 2025-01-23 | Introduction to Sigma:<br>Ep.3 — Sigma Tools                           | Recall the function of each Sigma tool   | 200           |
| 2025-01-23 | Introduction to Sigma:<br>Ep.2 — Syntax and<br>Structure               | Inspect the contents of Sigma rules written in YAML  | 40            |

## **Activity Report Page 3 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2025-01-23 | Introduction to Sigma:<br>Ep.1 — What is Sigma? | Recognize what Sigma is, how it's used, and who it helps         | 20            |
| 2025-01-23 | Python: Hardcoded<br>Secrets                    | Recognize the impact and consequences of using hardcoded secrets | 100           |
| 2025-01-23 | Python: SQL Injection                           | Know what an SQL injection vulnerability is and how it works     | 100           |
| 2025-01-23 | Yara: Ep.8                                      | Investigate unique data related to malware samples               | 200           |
| 2025-01-23 | Yara: Ep.6                                      | Investigate unique data related to malware samples               | 200           |
| 2025-01-23 | Yara: Ep.5                                      | Investigate unique data related to malware samples               | 200           |
| 2025-01-23 | Yara: Ep.4                                      | Investigate unique data related to malware samples               | 200           |
| 2025-01-23 | Yara: Ep.3                                      | Investigate unique data related to malware samples               | 200           |
| 2025-01-23 | Yara: Ep.7                                      | Investigate unique data related to malware samples               | 200           |
| 2025-01-22 | TLS Fundamentals: Ep.7 – TLS 1.3                | Identify key differences between TLS 1.3 and prior versions      | 40            |
| 2025-01-22 | TLS Fundamentals: Ep.6 – X.509 Analysis         | Describe how certificates are exchanged during a TLS handshake   | 100           |
| 2025-01-21 | S3: Multi-Region Access<br>Points (MRAPs)       | Recognize the benefits of S3 object replication                  | 100           |
| 2025-01-21 | Digital Forensics:<br>MagicBytes                | Conduct file header analysis in a forensic context               | 200           |
| 2025-01-17 | Threat Hunting: Cowrie<br>Honeypot              | Identify techniques used by attackers during SSH sessions        | 200           |
| 2025-01-17 | Threat Hunting: Fuzzy<br>Hashing                | Discover various methods of analysing files                      | 300           |

## **Activity Report Page 4 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2025-01-15 | Introduction to Aircrack-<br>ng: Ep.8 – Demonstrate<br>Your Skills     | Demonstrate your knowledge of how to use aircrack-ng to investigate and attack wireless networks | 300           |
| 2025-01-15 | Intro to Web App<br>Hacking: Stack Trace                               | Identify sensitive information in verbose error messages   | 100           |
| 2025-01-14 | NSA Kubernetes<br>Hardening: Ep.1 –<br>Introduction                    | Recognize the NSA's recommendations for Kubernetes hardening                                     | 10            |
| 2025-01-13 | ICS Malware: Triton  | Be able to reverse engineer py2exe files   | 200           |
| 2025-01-13 | IEC 61131-3: PLC<br>Programming  | Be able to recognize PLC programs written in IEC-61131-3 languages                               | 100           |
| 2025-01-13 | Human Machine<br>Interfaces  | Understand HMIs and their role in OT and ICS   | 100           |
| 2025-01-13 | Programmable Logic<br>Controllers                                      | Configure OpenPLC  | 200           |
| 2025-01-13 | PKI (Public Key<br>Infrastructure) Practical                           | Understand the different parts of PKI and their roles  | 200           |
| 2025-01-13 | IoT & Embedded<br>Devices: Binwalk                                     | Extract data from firmware images with Binwalk   | 200           |
| 2025-01-10 | Interactive RegEx: Ep.6 — Quantifiers                                  | Recall how to use logical operators in regex   | 200           |
| 2025-01-10 | Interactive RegEx: Ep.5 — Logical Metacharacters                       | Recall how to match patterns with character sets   | 100           |
| 2025-01-09 | Digital Forensics: Mozilla<br>Firefox Artifacts                        | Practice basic browser forensic techniques   | 100           |
| 2025-01-09 | Digital Forensics: Google<br>Chrome Artifacts                          | Practice and understand basic browser forensic techniques  | 100           |
| 2025-01-08 | Introduction to Python<br>Scripting: Ep.7 –<br>Demonstrate Your Skills | Demonstrate how to configure environments to write and execute Python scripts                    | 300           |
| 2025-01-03 | Interactive RegEx: Ep.4 — Character Sets                               | Recall how to match with the metacharacters dot, backslash, and line anchors                     | 40            |

## **Activity Report Page 5 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2025-01-02 | Interactive RegEx: Ep.3 — Simple Matching                    | Recall how to match alphanumeric characters in a string                                  | 40            |
| 2024-12-31 | S3: Restricting Access                                       | Recall access restriction mechanisms for S3 buckets and objects                          | 100           |
| 2024-12-31 | NGINX: Directory Listing                                     | Be able to identify that directory listing is enabled on a web server                    | 40            |
| 2024-12-31 | Hafnium: China Chopper                                       | Demonstrate ability to use an exploit chain to gain persistence on a web server          | 200           |
| 2024-12-30 | Human Connection<br>Challenge: Season 1 –<br>Scanning        | Demonstrate how to use scanning tools and techniques to enumerate and connect to targets | 400           |
| 2024-12-30 | PowerShell Basics: Ep.9 – Error Handling                     | Describe the different types of PowerShell errors  | 100           |
| 2024-12-30 | PowerShell Basics: Ep.8 – ISE and Scripting                  | Recall how to open PowerShell ISE  | 100           |
| 2024-12-30 | PowerShell Basics: Ep.6  – Processes and Services            | Explain how to find processes and services with PowerShell                               | 100           |
| 2024-12-30 | Introduction to the AWS<br>Console                           | Demonstrate service navigation using the AWS console                                     | 100           |
| 2024-12-30 | S3: Practical Introduction                                   | Navigate the AWS Management Console  | 100           |
| 2024-12-30 | PowerShell Basics: Ep.11 - Remoting                          | Recall how to create, manage, and remove remote sessions with PowerShell                 | 200           |
| 2024-12-30 | PowerShell Basics: Ep.10 – Event Logs                        | Recall how to view, filter, and analyze event logs using PowerShell                      | 100           |
| 2024-12-30 | PowerShell Basics: Ep.7 – Functions and Modules              | Describe what PowerShell functions and modules are                                       | 100           |
| 2024-12-24 | Kerberos: Ep.2 –<br>Enumeration                              | Recall various techniques to enumerate an Active Directory domain                        | 200           |
| 2024-12-24 | Infrastructure Pen<br>Testing: Ep.1 — Network<br>Enumeration | Recognize how the Nmap tool and its associated arguments work                            | 400           |

## **Activity Report Page 6 of 77**

| Date       | Lab  | Description   | Points Earned |
|------------|--|---|---------------|
| 2024-12-24 | Infrastructure Hacking:<br>FTP Anonymous Login                   | Identify and exploit FTP servers that have anonymous login enabled                      | 100           |
| 2024-12-24 | Persistence: Trap  | Apply trap commands that perform custom actions on receiving signals                    | 100           |
| 2024-12-24 | PoshC2: Ep.3 –<br>Enumerating the System                         | Knowledge of how to utilize the PoshC2 implant  | 300           |
| 2024-12-24 | Modern Encryption: RSA   | Describe what RSA encryption is, how it works, and why it's crucial in digital security | 40            |
| 2024-12-24 | Infrastructure Hacking:<br>Using SearchSploit                    | Locate information on exploits using<br>SearchSploit                                    | 200           |
| 2024-12-23 | Stack Overflow: Ep.1 –<br>Beginner (Theory)                      | Identify which common C and C++ functions can be insecure                               | 40            |
| 2024-12-23 | Offensive PowerShell:<br>Ep.3 – Defense Evasion                  | Recall the cmdlets used to learn information about a Windows firewall configuration     | 200           |
| 2024-12-23 | Discovery: Browser<br>Bookmarks                                  | Identify enumeration techniques by analyzing browser bookmark files                     | 100           |
| 2024-12-23 | Discovery: Enumeration<br>Scripts – Part 2                       | Identify information of interest to an attacker   | 200           |
| 2024-12-23 | Discovery: Enumeration<br>Scripts – Part 1                       | Identify information of interest to an attacker   | 200           |
| 2024-12-23 | Netcat: Ep.2 – Advanced<br>Features                              | Experience using Netcat to communicate to other hosts                                   | 200           |
| 2024-12-23 | Intro to Web App<br>Hacking: Command<br>Execution                | Practice leveraging web applications to execute arbitrary commands                      | 200           |
| 2024-12-20 | Reconnaissance: User<br>Enumeration – Website<br>Scraping Part 2 | Extract obfuscated emails from websites   | 200           |
| 2024-12-20 | Discovery: Active<br>Directory Enumeration                       | Describe how to obtain info about objects and shares using Veil-PowerView               | 300           |
| 2024-12-20 | Scanning: DrupeScan  | Practice automated scanning techniques using speciality tools                           | 200           |

## **Activity Report Page 7 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2024-12-19 | Microsoft Sentinel Deployment & Log Ingestion: Initial Setup | Recall the deployment process for Microsoft Sentinel                             | 200           |
| 2024-12-19 | Microsoft Azure Basics:<br>Fundamental Concepts              | Know the differences between tenants, subscriptions, and resource groups         | 10            |
| 2024-12-19 | Introduction to Microsoft<br>Sentinel                        | Recall Microsoft Sentinel's features   | 100           |
| 2024-12-19 | Microsoft Azure Basics:<br>Storage Accounts                  | Recall how to create and modify storage accounts                                 | 100           |
| 2024-12-19 | Microsoft Azure Basics:<br>Navigating the Web<br>Portal      | Access the Azure web portal  | 100           |
| 2024-12-18 | Find the Flaw: C –<br>Cryptographic Failures                 | Recognize cryptographic failures in C code                                       | 20            |
| 2024-12-18 | Practical Malware<br>Analysis: Ransomware<br>Static Analysis | Identify signs of Maze ransomware infections on a Windows host                   | 200           |
| 2024-12-18 | Computer Architecture: Demonstrate Your Knowledge            | Demonstrate knowledge of computer architecture                                   | 100           |
| 2024-12-18 | Introduction to 64-Bit<br>Architectures                      | Gain a high level understanding of 64-bit architectures                          | 40            |
| 2024-12-18 | Introduction to 32-Bit<br>Architectures                      | Gain a high-level understanding of 32-bit architectures                          | 40            |
| 2024-12-18 | The Inside of an ELF File                                    | Be able to identify components of an ELF file                                    | 40            |
| 2024-12-18 | The Inside of a PE File                                      | Gain a high level understanding of Portable Executables                          | 40            |
| 2024-12-18 | What Is the Stack?   | Gain a high level understanding of stack memory                                  | 40            |
| 2024-12-18 | What Is the Heap?  | Gain a high level understanding of heap memory                                   | 40            |
| 2024-12-18 | Introduction to Windows<br>Internals                         | Gain a high-level understanding of the Windows operating system's inner workings | 40            |

## **Activity Report Page 8 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2024-12-18 | An Introduction to Linux Internals                                  | Gain a high level understanding of the Linux operating system's inner workings | 40            |
| 2024-12-18 | ELF Execution Structure   | Discover the internals of an ELF executable structure                          | 200           |
| 2024-12-17 | PowerShell Basics: Ep.4  – Operators and Expressions                | Explain what PowerShell operators are  | 100           |
| 2024-12-17 | PowerShell Basics: Ep.3  – Variables                                | Describe what PowerShell variables are   | 100           |
| 2024-12-17 | AWS Logging and<br>Monitoring: Introduction<br>to CloudTrail        | Identify the core features of AWS<br>CloudTrail                                | 20            |
| 2024-12-17 | AWS Lambda:<br>Introduction to<br>Serverless Functions on<br>AWS    | Describe how Lambda provides Function as a Service                             | 20            |
| 2024-12-17 | AWS: Introduction to<br>Elastic Cloud Compute<br>(EC2)              | Describe AWS EC2 and the features it offers                                    | 20            |
| 2024-12-17 | AWS: Introduction to<br>AWS Identity and Access<br>Management (IAM) | Describe the features offered by IAM for access management                     | 20            |
| 2024-12-17 | AWS: Introduction to<br>Simple Storage Service<br>(S3)              | Identify the features of S3 and how it provides secure storage services        | 20            |
| 2024-12-17 | AWS: Introduction to<br>Amazon Web Services<br>(AWS)                | Describe what AWS is and the cloud services it offers                          | 10            |
| 2024-12-17 | Splunk: Malicious<br>Account Creation                               | Identify and recognize malicious events in system logs                         | 200           |
| 2024-12-17 | PowerShell Basics: Ep.2 – Cmdlets                                   | Explain what PowerShell cmdlets are  | 100           |
| 2024-12-16 | Secrets Management:<br>Secret Lifecycle                             | Identify the stages of a secret's lifecycle                                    | 20            |
| 2024-12-16 | Secrets Management:<br>Implementation                               | Identify key secrets management concepts                                       | 20            |
| 2024-12-16 | Secrets Management:<br>Introduction                                 | Identify what a secret is  | 20            |

## **Activity Report Page 9 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2024-12-16 | Secrets Management:<br>How Secrets Leak                                  | Identify the causes of secret leakage  | 20            |
| 2024-12-16 | Git Security: What are<br>Version Control<br>Systems?                    | Recall what version control is   | 20            |
| 2024-12-16 | Git Security: SSH Keys   | Recall why SSH keys are used   | 40            |
| 2024-12-16 | Git Security: Public and<br>Private Repositories                         | Recall when to create a public or private<br>Git repository                                  | 100           |
| 2024-12-16 | Git Security: Introduction to Git  | Identify the correct commands to create and commit to Git repositories                       | 100           |
| 2024-12-16 | Web Server Logs: Ep.6  — The Tomcat's Out Of The Bag                     | Identify evidence of a compromise in web server logs   | 300           |
| 2024-12-16 | Web Log Analysis: Ep.5 –<br>Searching Web Server<br>Logs using Linux CLI | Use cat, grep, cut, sort, uniq, and wc commands to search for information in web server logs | 200           |
| 2024-12-06 | Immersive Care: Ep.5 –<br>Reverse Engineering                            | Develop critical thinking  | 300           |
| 2024-12-06 | DFIR CTF: Malware<br>Memory  | Demonstrate your ability to capture the flag with no guidance                                | 300           |
| 2024-12-05 | TypeLib: COM<br>Persistence  | Outline malicious use cases for COM objects and monikers to abuse the Windows registry       | 200           |
| 2024-12-04 | DEEP GOSU Campaign:<br>Analysis  | Outline the ingress vectors used by Kimusky to deliver malware during the GOSU campaign      | 300           |
| 2024-12-04 | BlackCat WinSCP ISO<br>Trojan: Analysis                                  | Analyze the BlackCat Trojan  | 200           |
| 2024-12-04 | GOOTLOADER<br>Downloader: Analysis                                       | Extract indicators of compromise from a GOOTLOADER infection chain                           | 300           |
| 2024-11-25 | Tuoni 101: Ep.3 –<br>Payloads  | Describe what a Tuoni payload is   | 100           |
| 2024-11-25 | Tuoni 101: Ep.2 –<br>Listeners   | Describe what a Tuoni listener is  | 100           |

## **Activity Report Page 10 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2024-11-25 | Tuoni 101: Ep.1 – What is<br>Tuoni?                                     | Identify the core features of Tuoni  | 20            |
| 2024-11-25 | Secure Testing:<br>Sitemaps & Robots.txt                                | Identify potential sitemap and robots.txt risks in web applications, adding to your suite of QA tests                    | 40            |
| 2024-11-25 | SQLite3: An Introduction  | Practice querying an SQLite database file from the command line  | 100           |
| 2024-11-22 | CVE-2024-0012 and<br>CVE-2024-9474 (Palo<br>Alto PAN-OS) –<br>Defensive | Describe how attackers and offensive<br>teams can use public PoC code to exploit<br>a vulnerable Palo Alto PAN-OS server | 200           |
| 2024-11-18 | Introduction to<br>Kubernetes   | Recognize the fundamental concepts of Kubernetes   | 40            |
| 2024-11-18 | Kubernetes: Multi-<br>Container Pods                                    | Recognize how Kubernetes resources are grouped and accessed  | 200           |
| 2024-11-15 | Threat Hunting:<br>Analyzing Malicious<br>Python Packages               | Interact with a Python Package Index server  | 200           |
| 2024-11-13 | Human Connection<br>Challenge: Season 1 –<br>Basic OS Skills            | Demonstrate how to use various Linux and Windows command-line tools  | 300           |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.15 – Secure Use of<br>the Service            | Describe the importance of securely using a cloud service as per NCSC guidelines   | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.14 – Audit Information<br>for Users          | Recognize the role audit information plays in cloud security   | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.13 – Secure Service<br>Administration        | Recall the recommendations for secure service administration from NCSC   | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.12 – External<br>Interface Protection        | Recognize how to protect external interfaces within cloud environments   | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.10 – Secure User<br>Management               | Recognize the importance of secure user management as detailed by NCSC   | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.9 – Supply Chain<br>Security                 | Recognize the importance of supply chain security according to NCSC  | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.8 – Secure<br>Development                    | Recall the importance of secure development in cloud   | 20            |

## **Activity Report Page 11 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2024-11-13 | NCSC Cloud Security:<br>Ep.7 – Personnel<br>Security              | Recognize why personnel security is important in cloud environments  | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.6 – Operational<br>Security            | Recall the elements NCSC recommends understanding within a cloud provider's OPSEC                          | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.5 – Governance<br>Framework            | Identify how governance fits in with implementation cloud solutions according to NCSC                      | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.4 – Separation<br>Between Users        | Recall why user separation is important in cloud environments  | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.3 – Asset Protection<br>and Resilience | Describe the concerns of asset protection and resilience for cloud environments as per the NCSC guidelines | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.11 – Identity and<br>Authentication    | Recognize identity and authentication management and its importance within cloud environments              | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.2 – Data in Transit                    | Recall the ways in which data can be protected while it's in transit, according to NCSC                    | 20            |
| 2024-11-13 | NCSC Cloud Security:<br>Ep.1 – Introduction                       | Recognize NCSC's Cloud Security<br>Guidance at a high level  | 10            |
| 2024-11-13 | Threat Research: What is Cyber Threat Intelligence?               | A basic understanding of Cyber Threat<br>Intelligence's core areas   | 40            |
| 2024-11-13 | Threat Research: ASD<br>Essential Eight                           | Practice securing a system against<br>Microsoft Office macros  | 100           |
| 2024-11-01 | Return to Haunted<br>Hollow: Encryption<br>Enigma                 | Demonstrate encryption and decryption basics   | 200           |
| 2024-11-01 | OpenSCAP: Ep.1 –<br>Workbench                                     | Recall the function of SCAP Workbench and its applications   | 100           |
| 2024-11-01 | What is OpenSCAP?   | Describe what OpenSCAP is and how it works   | 20            |
| 2024-11-01 | What is SCAP?   | Describe the SCAP standard and its applications  | 20            |
| 2024-11-01 | SQLi Basics: Basic SQL<br>Injection                               | Construct SQL injection payloads   | 100           |

## **Activity Report Page 12 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2024-10-31 | Practical Malware<br>Analysis: Splunk Log<br>Analysis                          | Identify signs of Maze ransomware infections on a Windows host                                       | 100           |
| 2024-10-31 | Tickler Malware:<br>Analysis   | Demonstrate runtime analysis of the latest malicious threats   | 200           |
| 2024-10-31 | Practical Malware<br>Analysis: HOPLIGHT  | Demonstrate runtime analysis of the latest malicious threats   | 200           |
| 2024-10-30 | Windows Exploitation:<br>LOLBins   | Be able to use LOLBins by spawning a child process via a specified binary                            | 300           |
| 2024-10-30 | Practical Malware<br>Analysis: Network<br>Simulation                           | Demonstrate an understanding of the INetSim application for malware analysis                         | 200           |
| 2024-10-29 | Fortinet's Next-<br>Generation Firewall: Intro<br>to Fortigate                 | Recall Fortinet's firewall products  | 40            |
| 2024-10-28 | Return to Haunted<br>Hollow: PCAP<br>Pandemonium                               | Demonstrate Wireshark skills   | 100           |
| 2024-10-22 | Return to Haunted<br>Hollow: Phishing for<br>Treats                            | Identify how to spot the eerie signs that reveal a phishing email                                    | 20            |
| 2024-10-17 | IoCs and TTPs: Ep.5 –<br>Demonstrate Your Skills                               | Identify adversarial tactics, techniques, and procedures   | 100           |
| 2024-10-17 | loCs and TTPs: Ep.4 –<br>Management  | Describe how to manage IoCs and TTPs once they're obtained   | 40            |
| 2024-10-17 | IoCs and TTPs: Ep.3 –<br>Extracting and<br>Identifying                         | Outline how to identify adversarial tactics, techniques, and procedures                              | 40            |
| 2024-10-17 | IoCs and TTPs: Ep.2 –<br>What are TTPs?  | Outline what tactics, techniques, and procedures are   | 40            |
| 2024-10-17 | loCs and TTPs: Ep.1 –<br>What are loCs?  | Recall the aspects that make up an IoC   | 20            |
| 2024-10-09 | Privilege Escalation: Linux – Identifying Privilege Escalation Vulnerabilities | Recall where to look for privilege escalation vulnerabilities on a Linux system                      | 100           |
| 2024-10-09 | Privilege Escalation:<br>Linux – Automated<br>Enumeration                      | Describe what tools can be used to enumerate a Linux system for privilege escalation vulnerabilities | 200           |

## **Activity Report Page 13 of 77**

| Date       | Lab   | Description   | Points Earned |
|------------|---|---|---------------|
| 2024-10-09 | Privilege Escalation:<br>Linux – Introduction   | Describe what privilege escalation is   | 100           |
| 2024-10-08 | GhostEngine: Analysis   | Describe the unique execution flow used in the GhostEngine campaign                   | 200           |
| 2024-10-08 | CVE-2018-16858<br>(LibreOffice Remote<br>Code Execution)  | Identify commands in python script  | 200           |
| 2024-10-08 | What is a CVE?  | Basic understanding of what CVEs are and why you should care                          | 10            |
| 2024-10-07 | Post Exploitation With<br>Metasploit: Ep.2 –<br>Working With<br>Workspaces                        | Describe what workspaces are  | 100           |
| 2024-10-03 | Post Exploitation With<br>Metasploit: Ep.1 –<br>Database Configuration                            | Explain how to configure a PostgreSQL database  | 100           |
| 2024-10-02 | Mobile Application Security Fundamentals: OWASP Mobile Application Security Verification Standard | Recall the concepts of the OWASP Mobile<br>Application Security Verification Standard | 40            |
| 2024-10-02 | Mobile Application Security Fundamentals: OWASP Mobile Application Security Testing Guide         | Recall the concepts of the OWASP Mobile<br>Application Security Testing Guide         | 40            |
| 2024-10-02 | Mobile Application Security Fundamentals: Insufficient Binary Protections                         | Recall the fundamental concepts of insufficient binary protections                    | 20            |
| 2024-10-02 | Mobile Application Security Fundamentals: Insecure Data Storage                                   | Recall the fundamental concepts of insecure data storage                              | 20            |
| 2024-10-02 | Mobile Application Security Fundamentals: Insecure Communication                                  | Recall the fundamental concepts of insecure communication                             | 20            |
| 2024-09-30 | CVSS v4.0   | Outline how CVSS v4 is used to score the severity of vulnerabilities                  | 10            |
| 2024-09-30 | APT29 Threat Hunting<br>with Splunk: Ep.2 – Rapid<br>Collection and<br>Exfiltration               | Identify various tactics from the MITRE ATT&CK framework                              | 200           |
| 2024-09-30 | CVSS Calculator   | Calculate CVSS scores for given vulnerabilities                                       | 300           |
| 2024-09-26 | Introduction to Python<br>Scripting: Ep.6 – Log<br>Analysis and Anomaly                           | Be able to describe log analysis concepts   | 300           |

## **Activity Report Page 14 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2024-09-26 | Introduction to Python<br>Scripting: Ep.5 – Web<br>Scraping                                | Explain the fundamentals of web scraping, including its purpose and ethical considerations     | 100           |
| 2024-09-26 | PowerShell Deobfuscation: Ep.1 — Introduction  | Recall what PowerShell is and what it's used for   | 20            |
| 2024-09-26 | Windows Sysinternals:<br>Process Monitor   | Demonstrate an ability to use Process<br>Monitor   | 200           |
| 2024-09-25 | Hack Your First Web<br>App: Ep.6 – Demonstrate<br>Your Skills                              | Recognize the stages you need to follow when attempting to find and exploit vulnerable systems | 300           |
| 2024-09-25 | Hack Your First Web<br>App: Ep.5 – High-Risk<br>Vulnerabilities                            | Recall how a vulnerability could be categorized as high risk                                   | 200           |
| 2024-09-25 | Hack Your First Web<br>App: Ep.4 – Medium-Risk<br>Vulnerabilities                          | Recall how a vulnerability could be categorized as medium-risk                                 | 100           |
| 2024-09-25 | Hack Your First Web<br>App: Ep.3 – Low-Risk<br>Vulnerabilities                             | Recall how a vulnerability could be categorized as low-risk                                    | 200           |
| 2024-09-23 | Discovery: Windows<br>System Enumeration   | Experience enumerating users, patch levels, and password policy on Windows OS                  | 200           |
| 2024-09-20 | Foundational Static Analysis: Calling Conventions and Register Flow                        | Gain familiarity with the internals of malware from an assembly perspective                    | 200           |
| 2024-09-20 | Foundational Static<br>Analysis: API Analysis  | Perform analysis to identify potential API calls within malware samples                        | 200           |
| 2024-09-19 | CVE-2024-1086 (Linux<br>nf_tables Privilege<br>Escalation) Elastic<br>Analysis – Defensive | Outline a use-after-free vulnerability in the Linux kernel                                     | 300           |
| 2024-09-19 | CVE-2024-1086 (Linux<br>nf_tables Privilege<br>Escalation) – Offensive                     | Outline a use-after-free vulnerability in the Linux kernel                                     | 300           |
| 2024-09-19 | CVE-2024-1086 (Linux<br>nf_tables Privilege<br>Escalation) Splunk<br>Analysis – Defensive  | Outline a use-after-free vulnerability in the Linux kernel                                     | 300           |
| 2024-09-19 | CVE-2024-24576 (Rust RCE)  | Outline the components that allow the vulnerability to be exploited                            | 200           |
| 2024-09-18 | CVE-2024-30051<br>(Windows DWM Core<br>Library Elevation of<br>Privilege): Defensive       | Outline how complex heap-based buffer overflows work against the Windows DWM Core Library      | 300           |

| Date       | Lab  | Description   | Points Earned |
|------------|--|---|---------------|
| 2024-09-18 | CVE-2024-23692<br>(Rejetto HFS Template<br>Injection) – Defensive                | Outline how CVE-2024-23692 is exploited   | 100           |
| 2024-09-18 | CANBus: Ep.6 — In The Rear-View Mirror   | Identify areas of the theoretical knowledge that you may need to revisit                          | 100           |
| 2024-09-18 | CANBus: Ep.5 —<br>SocketCAN  | Be able to describe SocketCAN and how it enables intuitive interaction with CAN devices           | 40            |
| 2024-09-18 | CANBus: Ep.4 —<br>Messaging  | Demonstrate an understanding of the CANBus message concepts and formats                           | 100           |
| 2024-09-17 | Linux Exploitation: Ep.4 –<br>Demonstrate Your<br>Knowledge                      | Demonstrate an understanding of Linux exploitation processes and tools                            | 40            |
| 2024-09-17 | Mitre ATT&CK for ICS   | Use MITRE ATT&CK to map ICS threats and attacks to a common framework                             | 100           |
| 2024-09-17 | Operational Technology<br>Fundamentals: Common<br>Threats and<br>Vulnerabilities | Identify common threats and vulnerabilities relating to operational technology                    | 40            |
| 2024-09-17 | Operational Technology Fundamentals: SCADA and DCS                               | Differentiate between SCADA and DCS systems, including their primary purposes and architectures   | 40            |
| 2024-09-17 | Linux Exploitation: Ep.3 –<br>Tooling  | Understand what types of tools are commonly used within exploit development                       | 40            |
| 2024-09-17 | Linux Exploitation: Ep.2 –<br>The Exploit Development<br>Process                 | Understand how the exploit development process generally functions                                | 40            |
| 2024-09-17 | Linux Exploitation: Ep.1 – What is Linux Exploitation?                           | Outline what software exploitation is and why it can be a powerful tool                           | 40            |
| 2024-09-17 | Kerberos: Ep.1 – What is<br>Kerberos?  | Recognize the fundamentals of the Kerberos protocol   | 40            |
| 2024-09-16 | CANBus: Ep.3 — Threat<br>Models  | Recognize how threat models aid in analyzing CANBus security                                      | 20            |
| 2024-09-16 | CANBus: Ep.2 —<br>Systems  | Demonstrate an understanding of how CANBus systems are constructed and what they are connected to | 40            |
| 2024-09-16 | CANBus: Ep.1 — An Introduction   | Demonstrate an understanding of CANBus concepts   | 20            |

## **Activity Report Page 16 of 77**

| 2024-07-30 | DEFCON 2023: RDP<br>Tradecraft  | Analyze captured RDP sessions using RDP Player to identify potential indicators of compromise and understand threat actor techniques                  | 100           |
| 2024-07-30 | Protocols: HL7  | Analyze and interpret HL7 data within a PCAP file, demonstrating an understanding of the structure and function of HL7 messages transmitted over MLLP | 200           |
| 2024-07-29 | Introduction to Python Scripting: Ep.1 – Setting up the Environment         | Describe the basics of Python scripting and its applications in automation  | 100           |
| 2024-07-29 | The Haunted Hollow:<br>The Gatekeepers                                      | Demonstrate how to recover data from barcodes   | 20            |
| 2024-07-29 | Digital Forensics: DDE<br>Analysis  | Investigate different ways malware achieves execution after initial access  | 200           |
| 2024-07-26 | Privilege Escalation:<br>Windows – Finding<br>Passwords                     | Describe how to use the Windows command line to find files containing credentials for privilege escalation  | 200           |
| 2024-07-26 | Vulnerable Components:<br>Ghostscript (CVE-2018-<br>16509)                  | Know the fundamentals of the Ghostscript image-processing vulnerability   | 200           |
| 2024-07-25 | Wizard Spider DFIR: Ep.6 – Enumeration                                      | Recognize techniques used by Wizard<br>Spider during an attack  | 200           |
| 2024-07-25 | Wizard Spider DFIR: Ep.5  – Network Traversal                               | Recognize the techniques used by the Wizard Spider threat group during an attack  | 200           |
| 2024-07-25 | Wizard Spider DFIR: Ep.4  - Compromise Assessment                           | Recognize the techniques used by the Wizard Spider threat group during an attack  | 200           |
| 2024-07-25 | What is the Zed Attack Proxy (ZAP)?   | Identify the key features of an intercepting proxy and how it's used in security testing  | 20            |
| 2024-07-25 | Secure Tooling: Nikto   | Be able to run a Nikto scan to perform a security scan of a web application   | 40            |
| 2024-07-24 | Deepfakes   | Discuss the impact deepfakes can have on businesses   | 40            |
| 2024-07-24 | Find the Flaw: Python –<br>Injection  | Recognize injection vulnerabilities in Python code  | 20            |

## **Activity Report Page 21 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2024-07-24 | Find the Flaw: Python –<br>Identity and<br>Authentication Failures | Recognize identity and authentication failures in Python code                      | 20            |
| 2024-07-24 | Find the Flaw: Python –<br>Broken Access Control                   | Recognize broken access control vulnerabilities in Python code                     | 20            |
| 2024-07-24 | Threat Actors: Storm-<br>0978                                      | Analyze and identify specific TTPs used by Storm-0978                              | 100           |
| 2024-07-24 | Exploitation: Vulnerable<br>WebApps – XSS                          | Recall how cross-site scripting vulnerabilities can affect web applications        | 200           |
| 2024-07-24 | Weaponization: Payloads - Basics                                   | Recall what a payload is and where it is used                                      | 20            |
| 2024-07-24 | Digital Forensics: Ubuntu<br>Image Analysis                        | Investigate and analyze operating systems using common forensic techniques         | 400           |
| 2024-07-18 | CVE-2022-41049<br>(ZippyReads) – Offensive                         | Identify vulnerable versions of Windows  | 100           |
| 2024-07-18 | Ransomware:<br>MegaCortex  | Demonstrate ability to analyze ransomware using Splunk and Sysmon                  | 200           |
| 2024-07-15 | Reconnaissance: WHOIS<br>Service – Basics                          | Demonstrate an understanding of the WHOIS service by answering the questions       | 40            |
| 2024-07-12 | CTI First Principles: Ep.7  – Demonstrate Your Knowledge           | Describe cyber threat intelligence fundamentals                                    | 100           |
| 2024-07-12 | CTI First Principles: Ep.3  – Models and Methodologies             | Compare different models of CTI and their applications                             | 40            |
| 2024-07-12 | CTI First Principles: Ep.6  – Decomposition and Visualization      | Recognize techniques for breaking down complex information                         | 40            |
| 2024-07-12 | CTI First Principles: Ep.5  - Threat Intelligence Sources          | Outline what sources are available for gathering and enriching threat intelligence | 40            |
| 2024-07-12 | CTI First Principles: Ep.4  – Threat Actors and Attribution        | Outline what threat actors are and how they are attributed to incidents            | 100           |
| 2024-07-12 | CTI First Principles: Ep.2 - Lifecycles                            | Outline the components of the intelligence cycle                                   | 20            |

## **Activity Report Page 22 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2024-07-12 | CTI First Principles: Ep.1 – What is Cyber Threat Intelligence?             | Outline the relationship between data, information, and intelligence             | 10            |
| 2024-07-12 | Introduction To Elastic:<br>Ep.3 – Triage                                   | Understand the importance of using Elastic in triaging security incidents        | 100           |
| 2024-07-12 | Introduction To Elastic:<br>Ep.2 – Querying Data                            | Understand the importance of using Elastic when investigating security incidents | 200           |
| 2024-07-12 | Introduction To Elastic:<br>Ep.1 – What is Elastic?                         | Recall what the Elastic stack is   | 40            |
| 2024-07-11 | Nmap: Ep.7 – Scan<br>Optimization   | Describe Nmap's scan optimization techniques and options                         | 100           |
| 2024-07-11 | Nmap: Ep.4 – Port<br>Scanning   | Describe what port scanning is   | 100           |
| 2024-07-11 | Nmap: Ep.3 – Host<br>Discovery  | Describe Nmap's default host discovery options                                   | 100           |
| 2024-07-11 | Nmap: Ep.1 – Intro to<br>Nmap   | Explain what nmap is   | 40            |
| 2024-07-11 | Operational Technology Fundamentals: Purdue Model for ICS – Enterprise Zone | Identify what devices sit in the Enterprise Zone of the Purdue Model             | 10            |
| 2024-07-11 | Operational Technology Fundamentals: Purdue Model for ICS – Control Zone    | Be able to identify what devices sit in the<br>Control Zone of the Purdue Model  | 10            |
| 2024-07-11 | Operational Technology Fundamentals: IT, OT, ICS, and Embedded Devices      | Describe the differences in technologies used for IT and OT                      | 20            |
| 2024-07-11 | Digital Forensics: File<br>Systems  | Review and interpret the function of the Master Boot Record                      | 300           |
| 2024-07-11 | Nmap: Ep.6 – Scripting  | Describe what NSE is   | 200           |
| 2024-07-11 | Nmap: Ep.5 – OS and<br>Version Detection                                    | Describe what enumeration scans Nmap has available                               | 100           |
| 2024-07-10 | Autopsy: Demonstrate<br>Your Skills   | Demonstrate the skills you've gained in the Autopsy collection                   | 300           |

| 2024-07-10 | Browser Developer<br>Tools: Inspect Element                            | Recognize the benefits of using Inspect<br>Element                                     | 20            |
| 2024-07-10 | Browser Developer<br>Tools: Storage Inspector<br>and Cookies (Firefox) | Recognize the benefits of using the Storage Inspector in Firefox                       | 20            |
| 2024-07-10 | Browser Developer Tools: Application and Cookies (Chrome)              | Recognize the benefits of using the Application tab in Chrome                          | 20            |
| 2024-07-10 | Introduction to Browser<br>Developer Tools                             | Recognize the benefits of using browser developer tools                                | 10            |
| 2024-07-10 | Browser Developer<br>Tools: Network (Firefox)                          | Recognize the benefits of using the Network panel in Firefox                           | 20            |
| 2024-07-10 | Browser Developer<br>Tools: Network (Chrome)                           | Recognize the benefits of using the Network panel in Chrome                            | 40            |
| 2024-07-10 | Browser Developer Tools: Console and JavaScript Execution              | Identify the console panel within the browser developer tools                          | 20            |
| 2024-07-09 | Intro to Web App Hacking: Introduction to OWASP ZAP                    | Employ OWASP ZAP to analyze the web app  | 300           |
| 2024-07-08 | Introduction to Metasploit: Ep.8 – Post- Exploitation                  | Recall how to select and launch post-<br>exploitation modules against a target<br>host | 200           |
| 2024-07-08 | Introduction to<br>Metasploit: Ep.7 –<br>Meterpreter                   | Recognize common Meterpreter features  | 200           |
| 2024-07-08 | Introduction to<br>Metasploit: Ep.6 –<br>Payloads                      | Recognize how to identify appropriate<br>Metasploit payloads for a target system       | 100           |
| 2024-07-08 | Introduction to Metasploit: Ep.5 – Exploits                            | Identify appropriate Metasploit exploit modules  | 100           |
| 2024-07-08 | Introduction to Metasploit: Ep.4 – Enumeration                         | Recognize how enumeration modules can help gather information on a target              | 100           |
| 2024-06-28 | Hack Your First PC: Ep.7  – Demonstrate Your Skills                    | Demonstrate the ability to scan a Linux host with Nmap                                 | 300           |
| 2024-06-28 | Introduction to<br>Metasploit: Ep.3 –<br>Discovery                     | Recall how msfconsole modules can be used to scan and identify a target                | 100           |

## **Activity Report Page 24 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2024-06-28 | Introduction to<br>Metasploit: Ep.2 –<br>Modules           | Demonstrate how to start msfconsole  | 100           |
| 2024-06-28 | Introduction to Metasploit: Ep.1 – What is Metasploit?     | Recall the fundamentals of Metasploit  | 20            |
| 2024-06-28 | Introduction to Mimikatz                                   | Describe how to extract passwords in Windows using Mimikatz                                    | 200           |
| 2024-06-26 | Packet Analysis:<br>Malware Traffic                        | Recognize useful starting points for analysts when viewing network traffic                     | 200           |
| 2024-06-26 | Wireshark: Demonstrate<br>Your Skills                      | Identify relevant network traffic using<br>Wireshark   | 300           |
| 2024-05-09 | Hack Your First PC: Ep.6 — Privilege Escalation            | Recall potential ways of discovering system vulnerabilities                                    | 200           |
| 2024-05-09 | Hack Your First PC: Ep.5 — Gaining Access                  | Identify potential access vectors on a remote system   | 200           |
| 2024-05-09 | Hack Your First PC: Ep.4  — Brute Force                    | Recall the difference between a brute-<br>force attack and a dictionary attack                 | 200           |
| 2024-05-09 | Hack Your First PC: Ep.3 — Scanning for Targets            | Recall how to use Nmap to scan computer systems  | 200           |
| 2024-05-09 | Hack Your First PC: Ep.2  — Kali Linux                     | Navigate the Kali Desktop environment  | 200           |
| 2024-05-09 | Hack Your First PC: Ep.1 — Ozone Energy                    | Recognize the stages you need to follow when attempting to find and exploit vulnerable systems | 200           |
| 2024-04-30 | Staying Safe Online:<br>Phishing Emails (US)               | Recognize the main characteristics of phishing emails  | 20            |
| 2024-04-16 | Introduction to<br>Velociraptor: Ep.4 –<br>Searching       | Recognize how and when to use<br>Velociraptor  | 100           |
| 2024-04-16 | Introduction to<br>Velociraptor: Ep.3 – VQL                | Identify VQL structure using Velociraptor  | 100           |
| 2024-04-16 | Introduction to<br>Velociraptor: Ep.2 –<br>Getting Started | Identify event log structure using<br>Velociraptor   | 100           |

| 2024-03-28 | Active Directory Basics:<br>Ep.5 – NTLM vs<br>Kerberos             | Explain why authentication protocols are essential in an Active Directory environment | 40            |
| 2024-03-28 | Active Directory Basics:<br>Ep.4 – Adding a Machine                | Explain how to configure network settings for a DNS server                            | 100           |
| 2024-03-28 | Active Directory Basics:<br>Ep.3 – Objects                         | Describe what AD objects are  | 100           |
| 2024-03-27 | Device Security: Ep.4 –<br>Demonstrate Your<br>Knowledge           | Demonstrate an understanding of what device security is                               | 10            |
| 2024-03-27 | Windows Exploitation:<br>Ep.4 – Demonstrate Your<br>Knowledge      | Demonstrate an understanding of Windows exploitation processes and tools              | 40            |
| 2024-03-27 | Tactics: Demonstrate your Knowledge                                | Demonstrate your understanding of tactics in the MITRE ATT&CK® framework              | 40            |
| 2024-03-27 | Windows Exploitation:<br>Ep.3 – Tooling and<br>Languages           | List the tools used to perform Windows Exploitation                                   | 40            |
| 2024-03-27 | Windows Exploitation:<br>Ep.2 – Types of Common<br>Vulnerabilities | Recall the differences between common Windows vulnerabilities                         | 40            |
| 2024-03-27 | Windows Exploitation:<br>Ep.1 – What is Windows<br>Exploitation?   | Define what Windows exploitation entails  | 40            |

# **Activity Report Page 27 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2024-03-27 | Tactics: Exfiltration  | Recognize the purpose of the MITRE ATT&CK® Exfiltration tactic   | 20            |
| 2024-03-27 | Tactics: Impact  | Be able to explain the purpose of the MITRE ATT&CK® Impact tactic  | 20            |
| 2024-03-27 | Tactics: Collection  | Recognize the purpose of the MITRE ATT&CK® Collection tactic   | 20            |
| 2024-03-27 | Tactics: Command and Control   | Recognize the purpose of the MITRE ATT&CK® Command and Control tactic  | 20            |
| 2024-03-27 | Tactics: Lateral<br>Movement   | Recognize the MITRE ATT&CK® Lateral Movement tactic and its purpose  | 20            |
| 2024-03-27 | Malicious Document<br>Analysis: Introduction to<br>Malicious Documents | Identify different file structures used to create malicious documents  | 200           |
| 2024-03-27 | Malicious Document<br>Analysis: Visual Basic for<br>Applications (VBA) | Use oletools to extract and analyze malicious VBA  | 300           |
| 2024-03-26 | Device Security: Ep.3 –<br>Case Studies                                | Understand the concept of device security and its importance   | 10            |
| 2024-03-26 | Device Security: Ep.2 –<br>Increasing Your<br>Protection               | Understand the steps you should take to protect your devices in the office and when working in public places | 10            |
| 2024-03-26 | Device Security: Ep.1 – What is Device Security?                       | Understand the concept of device security and its importance   | 10            |
| 2024-03-26 | Threat Hunt Theory:<br>Demonstrate Your Skills                         | Understand the fundamental concepts of threat hunting  | 100           |
| 2024-03-26 | Threat Hunt Theory:<br>Emulating Adversaries                           | Recognize how emulating adversaries is beneficial in threat hunting  | 40            |
| 2024-03-26 | Threat Hunt Theory: Targeted Hunting Integrating Threat Intelligence   | Recognize how the Targeted Hunting integrating Threat Intelligence methodology is used in threat hunting     | 40            |
| 2024-03-26 | Threat Hunt Theory:<br>Management, Growth,<br>Metrics, and Assessment  | Recognize how the MaGMA model is used in threat hunting  | 40            |
| 2024-03-26 | Threat Hunt Theory:<br>Understanding the<br>Results                    | Recognize the importance of threat hunting results   | 40            |

## **Activity Report Page 28 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2024-03-26 | Threat Hunt Theory:<br>Data Quality                     | Recognize "good" data and why data quality is important in threat hunting  | 40            |
| 2024-03-26 | Threat Hunt Theory:<br>Documenting the Hunt             | Recognize the importance of documentation and automation in threat hunting | 40            |
| 2024-03-26 | Threat Hunt Theory:<br>Pyramid of Pain                  | Recognize the pyramid of pain  | 20            |
| 2024-03-26 | Threat Hunt Theory:<br>Types of Hunt                    | Recognize the different types of threat hunt                               | 10            |
| 2024-03-26 | Threat Hunt Theory:<br>Threat Intelligence<br>Lifecycle | Recognize the intelligence lifecycle                                       | 40            |
| 2024-03-26 | Threat Hunt Theory: The Threat Hunting Loop             | Recognize the threat hunting loop  | 40            |
| 2024-03-26 | Threat Hunt Theory:<br>Maturity Model                   | Recognize the threat hunting maturity model                                | 40            |
| 2024-03-26 | Threat Hunt Theory:<br>Threat Hunting Model             | Recognize the threat hunting process                                       | 40            |
| 2024-03-26 | Threat Hunt Theory:<br>Diamond Model                    | Recognize the diamond model  | 40            |
| 2024-03-26 | Tactics: Credential<br>Access                           | Recognize the purpose of the MITRE ATT&CK® Credential Access tactic        | 20            |
| 2024-03-26 | Tactics: Discovery                                      | Recognize the purpose of the MITRE ATT&CK® Discovery tactic                | 20            |
| 2024-03-26 | Exploitation Development: Compiled HTML                 | Describe the structure and contents of a CHM file                          | 200           |
| 2024-03-07 | Active Directory Basics:<br>Ep.2 – Console              | Describe what the Active Directory Users and Computers console is          | 100           |
| 2024-03-06 | Modern Encryption:<br>Demonstrate Your Skills           | Demonstrate the skills acquired through the beginner Encryption labs       | 300           |
| 2024-03-04 | DDOS Analysis: SYN<br>Flood                             | Understand the mechanics of SYN Flood DDoS attacks                         | 100           |

## **Activity Report Page 29 of 77**

| Date       | Lab   | Description   | Points Earned |
|------------|---|---|---------------|
| 2024-03-04 | DDOS Analysis: Ping of<br>Death   | Understand the mechanics of a Ping of Death attack  | 100           |
| 2024-03-04 | DDOS Analysis: What are DDoS Attacks?   | Understand the basic principles of DDoS attacks   | 20            |
| 2024-03-04 | ISO 22381: Ep.3 –<br>Demonstrate Your<br>Knowledge                            | Demonstrate your knowledge of ISO 22381   | 20            |
| 2024-03-04 | ISO 27018: Ep.5 –<br>Demonstrate Your<br>Knowledge                            | Recall the information on ISO 27018   | 20            |
| 2024-03-04 | ISO 27018: Ep.4 –<br>Access Control, Asset<br>Management, and<br>Cryptography | Recognize the elements that govern access control, asset management, and cryptography               | 10            |
| 2024-03-04 | ISO 27018: Ep.3 – Operations and Communications Security                      | Recognize the elements that make operational security important for protecting the integrity of PII | 20            |
| 2024-03-04 | ISO 27018: Ep.2 – Human<br>Resource and Physical<br>Security                  | Define the human elements that can impact PII data integrity in the cloud                           | 10            |
| 2024-03-04 | ISO 27018: Ep.1 –<br>Introduction   | Recall the scope of ISO 27018 and why it's important  | 10            |
| 2024-03-04 | ISO 22381: Ep.2 –<br>Interoperability Process                                 | Define the components that facilitate the interoperability process                                  | 10            |
| 2024-03-04 | ISO 22381: Ep.1 –<br>Introduction   | Define what policies are set out within the ISO 22381 standard                                      | 10            |
| 2024-03-04 | ISO 27014: Ep.3 –<br>Demonstrate Your<br>Knowledge                            | Demonstrate your knowledge of ISO 27014   | 20            |
| 2024-03-04 | ISO 27014: Ep.2 –<br>Implementation<br>Processes                              | Define the processes used to implement ISO 27014  | 10            |
| 2024-03-04 | ISO 27014: Ep.1 –<br>Introduction   | Recognize what the ISO 27014 standard is  | 10            |
| 2024-03-04 | ISO 31000: Ep.5 –<br>Demonstrate Your<br>Knowledge                            | Recall the information provided throughout the lab series   | 40            |
| 2024-03-04 | ISO 31000: Ep.4 –<br>Process  | Recall the process components illustrated within the ISO 31000 standard                             | 10            |

## **Activity Report Page 30 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2024-03-04 | ISO 31000: Ep.2 –<br>Principles   | Recall how ISO 31000 addresses policy and governance within its framework                            | 10            |
| 2024-03-04 | ISO 31000: Ep.3 –<br>Framework  | Recall how ISO 31000 uses a framework to apply principles and processes to a risk management program | 10            |
| 2024-03-04 | ISO 31000: Ep.1 –<br>Introduction   | Define what policies are set out within the ISO 31000 standard                                       | 10            |
| 2024-03-01 | Business Continuity 101:<br>Ep.5 – Demonstrate Your<br>Knowledge                  | Demonstrate your understanding of business continuity fundamentals                                   | 10            |
| 2024-03-01 | Business Continuity 101:<br>Ep.4 – Training and<br>Exercising                     | Describe the different methods of training and exercising in business continuity                     | 10            |
| 2024-03-01 | Business Continuity 101:<br>Ep.3 – Strategies                                     | Identify the different types of business continuity strategies                                       | 10            |
| 2024-03-01 | Business Continuity 101:<br>Ep.2 – Understanding<br>Risks and Impacts             | Identify the various risks and threats that can disrupt business operations                          | 10            |
| 2024-03-01 | Business Continuity 101:<br>Ep.1 – What is Business<br>Continuity?                | Explain the definition and scope of business continuity  | 10            |
| 2024-03-01 | Active Directory Basics:<br>Ep.1 – What is Active<br>Directory?                   | Describe what Active Directory is  | 40            |
| 2024-03-01 | Data Handling: Ep.4 –<br>Demonstrate Your<br>Knowledge                            | Demonstrate your understanding of data handling  | 10            |
| 2024-03-01 | Data Handling: Ep.3 –<br>Data Privacy and Access                                  | Understand the concepts surrounding data privacy   | 10            |
| 2024-03-01 | Data Handling: Ep.2 –<br>Gathering, Storing, and<br>Processing Data               | Understand how to gather and store data securely   | 10            |
| 2024-03-01 | Data Handling: Ep.1 –<br>Data Fundamentals  | Understand the concept of data handling  | 10            |
| 2024-03-01 | Security Reporting and<br>Responsiveness: Ep.4 –<br>Demonstrate Your<br>Knowledge | Demonstrate an understanding of why security reporting and responsiveness is important               | 10            |
| 2024-03-01 | Security Reporting and<br>Responsiveness: Ep.3 –<br>Responding<br>Appropriately   | Identify when you need to respond to potential incidents   | 10            |

## **Activity Report Page 31 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2024-03-01 | Security Reporting and<br>Responsiveness: Ep.2 –<br>Case Studies                        | Describe the potential impact of not reporting potential security incidents and concerns | 10            |
| 2024-03-01 | Security Reporting and<br>Responsiveness: Ep.1 –<br>Reporting Incidents and<br>Concerns | Recognize the importance of reporting potential security incidents and concerns          | 10            |
| 2024-03-01 | Introduction to Penetration Testing: Demonstrate Your Knowledge                         | Demonstrate an understanding of different penetration testing forms and concepts         | 40            |
| 2024-03-01 | Interactive RegEx: Ep.2 — The RegEx Interface   | Be familiar with the interface that will be used throughout the series                   | 20            |
| 2024-03-01 | Interactive RegEx: Ep.1 — An Introduction to RegEx                                      | Recall what regular expressions are and the task they perform                            | 10            |
| 2024-03-01 | Introduction to Penetration Testing: Web Applications                                   | Be able to demonstrate an understanding of web application hacking concepts              | 40            |
| 2024-03-01 | Introduction to Penetration Testing: Mobile Applications                                | Demonstrate an understanding of iOS/Android pen testing concepts                         | 40            |
| 2024-03-01 | Introduction to Penetration Testing: Infrastructure                                     | Demonstrate an understanding of infrastructure penetration testing concepts              | 40            |
| 2024-03-01 | Introduction to Penetration Testing: The Basics   | Be able to describe basic pen testing concepts   | 20            |
| 2024-02-29 | LockBit Builder: Analysis   | Outline how the LockBit ransomware builder operates                                      | 200           |
| 2024-02-29 | Ransomware: LockBit   | Identify signs of LockBit ransomware infections on a Windows host                        | 300           |
| 2024-02-28 | Secure Data Handling  | Recall fundamental concepts of input validation and output encoding                      | 40            |
| 2024-02-23 | Intro to Web App<br>Hacking: Authentication<br>Design Flaws                             | Know how to identify design flaws in a login authentication mechanism                    | 200           |
| 2024-02-23 | Intro to Web App<br>Hacking: Dirbuster –<br>Custom Headers                              | Practice using DirBuster with some of its more advanced options                          | 200           |
| 2024-02-23 | Intro to Web App<br>Hacking: Dirbuster –<br>Introduction                                | Use DirBuster  | 200           |

## **Activity Report Page 32 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2024-02-23 | Intro to Web App<br>Hacking: Mapping Web<br>Applications         | Enumerate a website's content and functionality  | 200           |
| 2024-02-23 | Intro to Web App<br>Hacking: Server Side<br>Includes             | Demonstrate SSI injection vulnerabilities  | 200           |
| 2024-02-22 | Reconnaissance: User<br>Enumeration –<br>WordPress               | Enumerate usernames from WordPress websites  | 100           |
| 2024-02-22 | Reconnaissance: User<br>Enumeration – SMTP                       | Recall how to enumerate users on an SMTP server  | 200           |
| 2024-02-22 | Reconnaissance: User<br>Enumeration – Website<br>Scraping Part 1 | Demonstrate extracting emails from websites  | 40            |
| 2024-02-22 | Reconnaissance: User<br>Enumeration – Basics                     | Recall how user enumeration is performed   | 20            |
| 2024-02-22 | Reconnaissance: DNS<br>Service – Zone Transfers                  | Analyze DNS information revealed by a zone transfer  | 200           |
| 2024-02-22 | Reconnaissance: DNS<br>Service – Brute Forcing                   | Enumerate a target's subdomains  | 100           |
| 2024-02-13 | Wizard Spider DFIR: Ep.3  – Risk Identification                  | Recognize the techniques used by<br>Wizard Spider during an attack                                 | 200           |
| 2024-02-08 | CVE-2019-0636<br>(Arbitrary File Read Zero<br>Day)               | Demonstrate ability to run basic exploits and assist in triaging                                   | 200           |
| 2024-02-07 | CVE-2023-24934 –<br>Defender Pretender                           | Outline the Windows Defender feature bypass vulnerability  | 100           |
| 2024-02-02 | CVE-2021-34473<br>(ProxyShell)                                   | Outline how the ProxyShell vulnerability is exploited  | 100           |
| 2024-02-02 | CVE-2021-26084<br>(Confluence) – RCE                             | Outline how the CVE-2021-26084 vulnerability leads to an RCE                                       | 40            |
| 2024-02-01 | Windows Basics: Ep.6 –<br>SMB and RDP                            | Demonstrate how to use SMB and RDP to manage the target system remotely                            | 100           |
| 2024-01-31 | Windows Basics:<br>Demonstrate Your Skills                       | Demonstrate how to interact with and<br>modify a Windows system with the<br>Windows Command Prompt | 400           |

## **Activity Report Page 33 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2024-01-30 | Windows Basics: Ep.7 –<br>Scheduled Tasks   | Demonstrate the ability to create and modify tasks   | 100           |
| 2024-01-30 | Windows Basics: Ep.5 –<br>Services  | Demonstrate how to set up and modify Windows services  | 100           |
| 2024-01-30 | Windows Basics: Ep.4 –<br>Managing Processes  | Explain how to view processes on the Windows system  | 100           |
| 2024-01-30 | Nessus: Ep.5 –<br>Demonstrate your Skills   | Interact with Nessus using the web interface   | 200           |
| 2024-01-30 | Nessus: Ep.4 – Scan<br>Results  | Demonstrate how to use Nessus to analyze exported scan results   | 100           |
| 2024-01-30 | Pwntools: Ep.1 — What is Pwntools?  | Recall what Pwntools is and how it functions   | 40            |
| 2024-01-30 | Nessus: Ep.3 –<br>Authenticated Scanning  | Demonstrate how to launch a Nessus scan from the basic network scan template                           | 100           |
| 2024-01-26 | Cyber Kill Chain:<br>Demonstrate Your Skills  | Describe all the stages from the Lockheed Martin Cyber Kill Chain®                                     | 400           |
| 2024-01-26 | Wizard Spider DFIR: Ep.2  – Ransomware Analysis   | Recognize the techniques used by the Wizard Spider threat group during an attack                       | 200           |
| 2024-01-25 | Privilege Escalation:<br>Windows – Automated<br>Enumeration                               | Describe what tools can be used to enumerate a Windows system for privilege escalation vulnerabilities | 200           |
| 2024-01-25 | Privilege Escalation:<br>Windows – Identifying<br>Privilege Escalation<br>Vulnerabilities | Describe where to look for privilege escalation vulnerabilities on a Windows system                    | 200           |
| 2024-01-25 | Privilege Escalation:<br>Windows – Introduction   | Describe what privilege escalation is  | 100           |
| 2024-01-25 | Wireshark: Metrics and Statistics   | Analyze network packet captures using Wireshark statistics   | 100           |
| 2024-01-24 | Cyber Kill Chain: Actions on Objectives   | Recognize the fundamentals of the actions on objectives phase in the Cyber Kill Chain                  | 200           |
| 2024-01-24 | Cyber Kill Chain:<br>Command and Control  | Recognize the fundamentals of the command and control phase in the Cyber Kill Chain                    | 200           |

## **Activity Report Page 34 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2024-01-24 | Cyber Kill Chain:<br>Installation                              | Recognize the fundamentals of the installation phase in the Cyber Kill Chain   | 200           |
| 2024-01-24 | Cyber Kill Chain:<br>Exploitation                              | Recognize the fundamentals of the exploitation phase in the Cyber Kill Chain   | 200           |
| 2024-01-19 | Windows Basics: Ep.3 –<br>Registry                             | Recall how to view the Windows registry  | 100           |
| 2024-01-19 | Windows Basics: Ep.2 –<br>Users and Groups                     | Recall how to find users and groups on a Windows system                        | 100           |
| 2024-01-19 | Windows Basics: Ep.1 –<br>Command Prompt                       | Recall how to open the Windows<br>Command Prompt                               | 40            |
| 2024-01-19 | Browsing Securely: Ep.5  – Demonstrate Your Knowledge          | Demonstrate your understanding of browsing securely                            | 10            |
| 2024-01-19 | Browsing Securely: Ep.4  - Cookies and Pop-Ups                 | Identify how to protect yourself with cookies, warnings, and pop-ups           | 10            |
| 2024-01-19 | Browsing Securely: Ep.3 - Browsers                             | Identify the different ways that you can protect yourself when browsing online | 10            |
| 2024-01-19 | Browsing Securely: Ep.2  - Case Studies                        | Recall key facts about notable insecure browsing incidents                     | 10            |
| 2024-01-19 | Browsing Securely: Ep.1  – What is Secure Browsing?            | Identify what secure browsing is   | 10            |
| 2024-01-18 | Authentication: Ep.5 –<br>Demonstrate Your<br>Knowledge        | Demonstrate your knowledge of authentication                                   | 10            |
| 2024-01-18 | Authentication: Ep.4 –<br>Adding an Extra Layer of<br>Security | Describe why adding more layers of authentication is important                 | 10            |
| 2024-01-18 | Authentication: Ep.3 –<br>Creating Secure<br>Passwords         | Describe why passwords are important   | 10            |
| 2024-01-18 | Authentication: Ep.2 –<br>Why Are Passwords<br>Important?      | Describe why passwords are important   | 10            |
| 2024-01-18 | Authentication: Ep.1 – What is Authentication?                 | Identify what authentication is  | 10            |

## **Activity Report Page 35 of 77**

| Date       | Lab   | Description   | Points Earned |
|------------|---|---|---------------|
| 2024-01-15 | ISO 28000: Ep.1 – What is ISO 28000?                        | Outline the ISO 28000 standard  | 10            |
| 2024-01-14 | Omnipotent Productions:<br>Ep.6 – Theory                    | Understand how to identify and mitigate risk  | 10            |
| 2024-01-14 | Omnipotent Productions:<br>Ep.5 – Forensics                 | Demonstrate how to recover deleted files with Autopsy                                   | 200           |
| 2024-01-12 | Omnipotent Productions:<br>Ep.3 – OSINT                     | Employ open-source intelligence to investigate the hacking group and its related people | 100           |
| 2024-01-12 | Omnipotent Productions:<br>Ep.4 – Packet Analysis           | Be capable of analyzing malicious network traffic                                       | 40            |
| 2024-01-12 | Omnipotent Productions:<br>Ep.2 – FTP Server<br>Hardening   | Use the CLI to reconfigure an FTP server  | 200           |
| 2024-01-12 | Cyber Kill Chain: Delivery                                  | Recognize the fundamentals of the delivery phase in the Cyber Kill Chain                | 200           |
| 2024-01-12 | Cyber Kill Chain:<br>Weaponization                          | Recognize the fundamentals of the weaponization phase in the Cyber Kill Chain           | 200           |
| 2024-01-11 | Scanning: Demonstrate<br>Your Skills                        | Scan and identify information about two targets   | 200           |
| 2024-01-09 | Vulnerability Management: Ep.6 — Demonstrate Your Knowledge | Recognize the fundamentals of vulnerability management                                  | 40            |
| 2024-01-09 | What is Vulnerability<br>Management?                        | Recall what vulnerability management is and its importance in defensive cybersecurity   | 20            |
| 2024-01-09 | Vulnerability Management: Ep.3 — Evaluate and Prioritize    | Explain the prioritizing step within the Vulnerability Management process               | 20            |
| 2024-01-09 | Vulnerability<br>Management: Ep.4 —<br>Remediate            | Identify what it means to remediate discovered and known vulnerabilities                | 20            |
| 2024-01-09 | Vulnerability<br>Management: Ep.5 —<br>Report               | Understand the process of reporting vulnerabilities                                     | 20            |
| 2024-01-09 | Vulnerability Management: Ep.2 — Monitoring and Identifying | Identify the process for monitoring and identifying vulnerabilities                     | 20            |

## **Activity Report Page 36 of 77**

| Date       | Lab   | Description   | Points Earned |
|------------|---|---|---------------|
| 2024-01-09 | Vulnerability Management: Ep.1 – Asset and System Inventory                 | Identify the hardware and software assets   | 20            |
| 2024-01-09 | Packet Analysis: TLS<br>Handshake   | Revise information on the TLS<br>Handshake  | 100           |
| 2024-01-09 | Nessus: Ep.2 – Network<br>Scanning  | Demonstrate how to launch a Nessus scan from the Host Discovery template  | 100           |
| 2024-01-09 | Nessus: Ep.1 –<br>Introduction to Nessus                                    | Describe typical uses of the Nessus<br>Vulnerability Assessment tool  | 100           |
| 2024-01-05 | Cyber for Board<br>Members: Ep.9 –<br>Planning and Response                 | Outline how your organization can detect and respond to cyber incidents   | 10            |
| 2024-01-05 | Cyber for Board<br>Members: Ep.8 – Supply<br>Chains                         | Define supply chains  | 10            |
| 2024-01-05 | Cyber for Board<br>Members: Ep.7 –<br>Cybersecurity<br>Implementation       | Recognize why an effective cybersecurity strategy is important  | 10            |
| 2024-01-05 | ISO 27001: Ep.2 – The Domains of ISO 27001                                  | Define risk-based security approaches   | 20            |
| 2024-01-05 | ISO 27001: Ep.3 – What<br>About You?  | Compare how ISO 27001 applies across various areas of an organization   | 20            |
| 2024-01-05 | Web Log Analysis: Ep.4 — Error Logs   | Recognize web server error logs   | 100           |
| 2024-01-05 | NIST 800-144 Cloud<br>Security: Ep.9 – Incident<br>Response                 | Explain concerns and recommendations for incident response in cloud environments as detailed by NIST                        | 10            |
| 2024-01-05 | NIST 800-144 Cloud<br>Security: Ep.7 – Data<br>Protection                   | Recall NIST 800-144 concerns and recommendations for data protection in cloud environments                                  | 10            |
| 2024-01-05 | NIST 800-144 Cloud<br>Security: Ep.8 –<br>Availability                      | Describe the concerns and recommendations for cloud availability according to NIST 800-144                                  | 10            |
| 2024-01-05 | NIST 800-144 Cloud<br>Security: Ep.6 – Software<br>Isolation                | Recall what multi-tenancy architecture is   | 20            |
| 2024-01-05 | NIST 800-144 Cloud<br>Security: Ep.5 – Identity<br>and Access<br>Management | Recall the concerns and recommendations for identity and access management in cloud security as per NIST 800-144 guidelines | 20            |

# **Activity Report Page 37 of 77**

| Date       | Lab  | Description   | Points Earned |
|------------|--|---|---------------|
| 2024-01-05 | NIST 800-144 Cloud<br>Security: Ep.4 –<br>Architecture                         | Explain NIST's recommendations and concerns about architecture with regards to cloud security | 10            |
| 2024-01-05 | NIST 800-144 Cloud<br>Security: Ep.3 – Trust                                   | Explain the concern for trust in cloud security   | 10            |
| 2024-01-05 | NIST 800-144 Cloud<br>Security: Ep.2 –<br>Compliance                           | Recognize why compliance is important for cloud security                                      | 10            |
| 2024-01-05 | NIST 800-144 Cloud<br>Security: Ep.1 –<br>Governance                           | Recall how governance is important to NIST cloud security guidelines                          | 10            |
| 2024-01-05 | NIST 800-144: Guidelines on Security and Privacy in Public Cloud Computing     | Recall the NIST 800-144 guidelines at a high level  | 10            |
| 2024-01-05 | Cyber for Board<br>Members: Ep.6 – Risk<br>Management                          | Outline why risk management is more than just compliance                                      | 10            |
| 2024-01-05 | Cyber for Board<br>Members: Ep.5 – Cyber<br>Threats                            | Define common cyber threats   | 10            |
| 2024-01-05 | Cyber for Board Members: Ep.4 – Culture and Cybersecurity                      | Discuss why a positive culture is needed  | 10            |
| 2024-01-05 | Cyber for Board<br>Members: Ep.3 –<br>Security Posture                         | Define security posture   | 10            |
| 2024-01-05 | Cyber for Board<br>Members: Ep.2 – Cyber<br>Expertise                          | Demonstrate your knowledge of what makes a qualified cyber professional                       | 10            |
| 2024-01-05 | Cyber for Board<br>Members: Ep.1 –<br>Cybersecurity and<br>Business Objectives | Define cybersecurity and business objectives  | 10            |
| 2024-01-04 | NIST 800-53: Ep.21 –<br>Demonstrate your<br>Knowledge                          | Demonstrate your understanding of NIST 800-53 and its purpose                                 | 40            |
| 2024-01-04 | NIST 800-53: Ep.20 –<br>Supply Chain Risk<br>Management                        | Recognize supply chain risk management controls   | 20            |
| 2024-01-04 | NIST 800-53: Ep.19 –<br>System and Information<br>Integrity                    | Recognize system and information integrity controls and their purpose                         | 40            |
| 2024-01-04 | NIST 800-53: Ep.18 –<br>System and<br>Communications<br>Protection             | Recognize system and communications protection controls and their purpose                     | 40            |

| 2024-01-04 | NIST 800-53: Ep.9 –<br>Maintenance   | Recognize maintenance controls and their purpose                               | 20            |
| 2024-01-04 | NIST 800-53: Ep.8 –<br>Incident Response   | Recognize incident response controls and their purpose                         | 20            |
| 2024-01-04 | NIST 800-53: Ep.7 –<br>Identification and<br>Authentication                                  | Recognize identification and authentication controls and their purpose         | 20            |
| 2024-01-04 | NIST 800-53: Ep.6 –<br>Contingency Planning  | Recognize contingency planning controls and their purpose                      | 20            |
| 2024-01-04 | NIST 800-53: Ep.5 –<br>Configuration<br>Management   | Recognize configuration management controls and their purpose                  | 20            |
| 2024-01-04 | NIST 800-53: Ep.4 –<br>Assessment,<br>Authorization, and<br>Monitoring                       | Recognize assessment, authorization, and monitoring controls and their purpose | 20            |
| 2024-01-04 | NIST 800-53: Ep.3 –<br>Audit and Accountability  | Recognize audit and accountability controls and their purpose                  | 20            |

## **Activity Report Page 39 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2024-01-04 | Splunk Basics:<br>Demonstrate Your Skills                           | Recall the Splunk features and how to use them   | 200           |
| 2024-01-04 | Splunk Basics: Ep.5 –<br>Dashboards and<br>Visualization            | Recognize dashboards and how they can be used  | 100           |
| 2024-01-04 | Splunk Basics: Ep.4 –<br>Advanced Searching<br>(SPL & Transforming) | Use Splunk's Search Processing<br>Language (SPL) to search for and<br>transform specific information | 200           |
| 2024-01-03 | Splunk Basics: Ep.3 –<br>Search                                     | Identify the key structure of a basic<br>Splunk search   | 100           |
| 2024-01-03 | Elastic Data Ingest:<br>Demonstrate Your Skills                     | Demonstrate log analysis techniques using the Elastic Stack to investigate suspicious activity       | 300           |
| 2024-01-03 | Elastic Data Ingest: Ep.6 – Winlogbeat                              | Demonstrate log analysis techniques using Winlogbeat and the Elastic Stack                           | 200           |
| 2024-01-03 | Elastic Data Ingest: Ep.3  – Heartbeat                              | Demonstrate log analysis techniques using Heartbeat and the Elastic Stack                            | 200           |
| 2024-01-03 | Elastic Data Ingest: Ep.5<br>– Packetbeat                           | Demonstrate log analysis techniques using Packetbeat and the Elastic Stack                           | 200           |
| 2024-01-03 | Elastic Data Ingest: Ep.4 – Metricbeat                              | Demonstrate log analysis techniques using Metricbeat and the Elastic Stack                           | 200           |
| 2024-01-03 | Elastic Data Ingest: Ep.1 – Auditbeat                               | Demonstrate log analysis techniques using Auditbeat and the Elastic Stack                            | 200           |
| 2024-01-03 | Elastic Data Ingest: Ep.2<br>– Filebeat                             | Demonstrate log analysis techniques using Filebeat and the Elastic Stack                             | 200           |
| 2024-01-03 | Elastic Playground: Flight<br>Data                                  | Demonstrate log analysis techniques using the Elastic Stack  | 100           |
| 2024-01-02 | Splunk Basics: Ep.2 –<br>Data Sources                               | Be able to recall the various data sources supported by Splunk                                       | 40            |
| 2024-01-02 | Splunk Basics: Ep.1 – The<br>Splunk Interface                       | Recognize the different components of the Splunk Interface   | 40            |
| 2024-01-02 | What is Splunk?   | Recall what the Splunk tool is   | 40            |

## **Activity Report Page 40 of 77**

| Date       | Lab  | Description   | Points Earned |
|------------|--|---|---------------|
| 2024-01-02 | Elastic Playground: Web<br>Logs                            | Demonstrate log analysis techniques using the Elastic Stack | 100           |
| 2024-01-02 | Elastic Playground:<br>eCommerce Data                      | Demonstrate log analysis techniques using the Elastic Stack | 100           |
| 2024-01-02 | WPA Wordlist Crack   | Identify weaknesses in Wi-Fi protocols                      | 100           |
| 2024-01-02 | Wired Equivalent Privacy<br>(WEP) Cracking                 | Identify weaknesses in Wi-Fi protocols                      | 200           |
| 2024-01-02 | Pen Test CTFs: Shadow<br>Brokers' Victim                   | Exploiting a victim   | 300           |
| 2024-01-01 | Linux CLI: Ep.17 –<br>Demonstrate Your Skills              | Demonstrate your understanding of the Linux CLI             | 100           |
| 2024-01-01 | PKI (Public Key<br>Infrastructure)                         | Understand the different parts of PKI and their roles       | 40            |
| 2023-12-30 | Windows Forensics<br>Artifacts: Demonstrate<br>Your Skills | Recognize the different artifacts you can find in Windows   | 100           |
| 2023-12-30 | Windows Forensics<br>Artifacts: Link Files (LNK)           | Recall what the Shell Link Binary File Format is            | 20            |
| 2023-12-30 | Windows Forensics<br>Artifacts: Master File<br>Table       | Recall what the Master File Table is                        | 40            |
| 2023-12-30 | Windows Forensics<br>Artifacts: Recycle Bin                | Recall what Recycle Bin artifacts are                       | 40            |
| 2023-12-30 | Windows Forensics<br>Artifacts: ShellBags                  | Recall what ShellBags are and where to find this artifact   | 40            |
| 2023-12-30 | Windows Forensics<br>Artifacts: UserAssist                 | Recall the location, use, and format of the UserAssist Key  | 40            |
| 2023-12-30 | Digital Forensics<br>Process: Demonstrate<br>Your Skills   | Recognize the fundamentals of the forensic process          | 40            |
| 2023-12-30 | Windows Forensics<br>Artifacts: Event Logs                 | Recall what event logs are and where to find this artifact  | 40            |

## **Activity Report Page 41 of 77**

| Date       | Lab  | Description   | Points Earned |
|------------|--|---|---------------|
| 2023-12-30 | Windows Forensics<br>Artifacts: Prefetch Files                   | Recall what prefetch files are and where to find them   | 40            |
| 2023-12-30 | Windows Forensics Artifacts: AppCompatCache                      | Recall what the AppCompactCache is and where to find it   | 40            |
| 2023-12-30 | Windows Forensics<br>Artifacts: Amcache                          | Recall what the Amcache is and where to find this artifact  | 40            |
| 2023-12-30 | Digital Forensics<br>Process: Collection –<br>Ensure Integrity   | Identify how the integrity of digital evidence is verified  | 20            |
| 2023-12-30 | Digital Forensics Process: Anti-Forensics Techniques             | Identify what anti-forensics techniques are   | 40            |
| 2023-12-30 | Digital Forensics Process: Interpretation – Analyzing Findings   | Recall the process of analyzing forensic evidence   | 40            |
| 2023-12-30 | Digital Forensics Process: Interpretation – Identify and Extract | Recall how to navigate through data and find forensic artifacts   | 40            |
| 2023-12-30 | Digital Forensics Process: Collection – Types of Acquisition     | Identify the different types of acquisition   | 40            |
| 2023-12-30 | Digital Forensics<br>Process: Introduction                       | Recall the steps of the digital forensics process   | 20            |
| 2023-12-30 | Elliptic Curve<br>Cryptography                                   | Explain the basics of elliptic curve cryptography   | 100           |
| 2023-12-30 | Cyber for Executives:<br>Ep.7 – Supply Chain<br>Security         | Define 'supply chain security'  | 10            |
| 2023-12-30 | Cyber for Executives:<br>Ep.6 – Whaling                          | Define 'whaling'  | 10            |
| 2023-12-30 | Cyber for Executives:<br>Ep.4 – Common Threats                   | Identify the most common cyber threats facing organizations   | 10            |
| 2023-12-30 | Cyber for Executives:<br>Ep.3 – Incidents                        | Outline what executives can do to contribute to the protection of their organization during an incident | 10            |
| 2023-12-30 | Cyber for Executives:<br>Ep.8 – Compliance                       | Be able to define 'compliance'  | 10            |

## **Activity Report Page 42 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2023-12-30 | Cyber for Executives:<br>Ep.2 – Skills Shortage   | Define skills shortages and how they can impact organizations                  | 10            |
| 2023-12-30 | Cyber for Executives:<br>Ep.5 – Risk  | Define 'risk'  | 10            |
| 2023-12-30 | Cyber for Executives:<br>Ep.1 – What is InfoSec?  | Define the scope of information security                                       | 10            |
| 2023-12-29 | Introduction to Incident<br>Response: Ep.7 –<br>Demonstrate Your<br>Knowledge                 | Recall the key steps of the NIST incident response process                     | 40            |
| 2023-12-29 | Volatility Memory<br>Analysis: Ep.7 – File<br>Systems   | Enumerate the Windows Master File<br>Table                                     | 100           |
| 2023-12-29 | Volatility Memory<br>Analysis: Ep.6 – Registry  | Enumerate registry hive information  | 100           |
| 2023-12-29 | Volatility Memory<br>Analysis: Ep.5 –<br>Networking   | Identify open connections in a memory capture                                  | 100           |
| 2023-12-29 | Crisis Management 101:<br>Ep.5 – Crisis<br>Communications                                     | Recognize principles of good crisis communication                              | 10            |
| 2023-12-29 | Crisis Management 101:<br>Ep.4 – Cyber Crisis<br>Decision Making                              | Recognize different types of decisions you'll experience in a crisis situation | 10            |
| 2023-12-29 | Crisis Management 101:<br>Ep.3 – Tame and Wicked<br>Problems                                  | Identify key characteristics of tame and wicked problems                       | 10            |
| 2023-12-29 | Crisis Management 101:<br>Ep.2 – Situational<br>Awareness                                     | Identify the steps involved in situational awareness                           | 10            |
| 2023-12-29 | NIST 800-53: Ep.2 –<br>Awareness and Training   | Recognize the purpose of awareness and training controls                       | 20            |
| 2023-12-29 | NIST 800-53: Ep.1 –<br>Access Control   | Recognize the NIST 800-53 Access<br>Control family and its purpose             | 20            |
| 2023-12-29 | NIST 800-53: Security<br>and Privacy Controls for<br>Information Systems and<br>Organizations | Familiarize yourself with NIST 800-53 and its purpose                          | 20            |
| 2023-12-29 | Crisis Management 101:<br>Ep.1 – Incidents Vs<br>Crises                                       | Describe the difference between cyber incidents and crises                     | 10            |

# **Activity Report Page 43 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2023-12-29 | Introduction to Incident<br>Response: Ep.6 – Post-<br>Incident Activity          | Recall the post-incident activity stage of the NIST incident response process  | 40            |
| 2023-12-29 | Introduction to Incident<br>Response: Ep.4 –<br>Detection and Analysis           | Discuss the detection and analysis stage of the NIST incident response process   | 40            |
| 2023-12-29 | Introduction to Incident Response: Ep.5 – Containment, Eradication, and Recovery | Recall and discuss the containment, eradication, and recovery stage of the NIST incident response process  | 40            |
| 2023-12-29 | Introduction to Incident<br>Response: Ep.3 –<br>Preparation                      | Discuss the details of the preparation stage of NIST's incident response process   | 40            |
| 2023-12-28 | Volatility Memory<br>Analysis: Ep.4 – Kernel<br>Memory and Objects               | Recall the fundamentals of kernel modules and drivers  | 100           |
| 2023-12-28 | Volatility Memory<br>Analysis: Ep.3 – Process<br>Memory                          | Recall fundamental memory structures and operations  | 100           |
| 2023-12-28 | Volatility Memory<br>Analysis: Ep.2 –<br>Processes and DLLs                      | Recognize system processes in memory   | 100           |
| 2023-12-28 | Volatility Memory<br>Analysis: Ep.1 – Getting<br>Started                         | Demonstrate basic usage of the Volatility tool   | 100           |
| 2023-12-28 | Volatility: What is the Volatility Framework?                                    | Recall what the Volatility framework is  | 20            |
| 2023-12-27 | Introduction to Penetration Test Programs: Ep.11 – Demonstrate Your Knowledge    | Demonstrate your understanding of penetration test programs  | 40            |
| 2023-12-27 | Cyber Kill Chain: Ep.10 –<br>Demonstrate Your<br>Knowledge                       | Recognize the fundamentals of the Cyber<br>Kill Chain model  | 40            |
| 2023-12-27 | Introduction to Networking: Ep.7 — Demonstrate Your Knowledge                    | Demonstrate an understanding of networking technology fundamentals   | 40            |
| 2023-12-27 | Introduction to Penetration Test Programs: Ep.10 – Improving your Program        | Describe how a penetration testing program could be improved   | 20            |
| 2023-12-27 | Introduction to Penetration Test Programs: Ep.9 – Post- Engagement Activities    | Outline what post-engagement activities are and how an organization can use them to mitigate business risks once a penetration test is completed | 20            |
| 2023-12-27 | Introduction to<br>Penetration Test  | Describe what is typically contained in a penetration report and how findings  | 20            |

#### **Activity Report Page 44 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2023-12-27 | Introduction to Penetration Test Programs: Ep.7 – Engagement Activities         | Identify some of the activities an organization can expect to happen during a penetration test | 20            |
| 2023-12-27 | Introduction to Penetration Test Programs: Ep.6 – Pre- Engagement Activities    | Identify some of the activities an organization might perform before each penetration test     | 20            |
| 2023-12-27 | Introduction to Penetration Test Programs: Ep.5 – Testing Management            | Identify management processes required when performing penetration tests                       | 20            |
| 2023-12-27 | Introduction to Penetration Test Programs: Ep.4 – Choosing a Supplier           | Identify criteria for a penetration test supplier  | 20            |
| 2023-12-27 | Introduction to Penetration Test Programs: Ep.3 – Defining your Testing Program | Identify which areas of a pen testing program need to be defined                               | 20            |
| 2023-12-27 | Introduction to Penetration Test Programs: Ep.2 – Cybersecurity Frameworks      | Describe how technical assurance frameworks can include penetration testing                    | 20            |
| 2023-12-27 | Introduction to Penetration Test Programs: Ep.1 – What is Pen Testing?          | Define what a penetration test is  | 20            |
| 2023-12-27 | Inherent vs Residual Risk   | Explain the difference between inherent and residual risk                                      | 20            |
| 2023-12-27 | Reconnaissance: DNS<br>Enumeration – TXT  | Summarize the fundamentals of TXT records  | 40            |
| 2023-12-27 | Reconnaissance: DNS<br>Service – MX Record                                      | Demonstrate finding a domain's mail server   | 40            |
| 2023-12-27 | Reconnaissance: DNS<br>Enumeration – NS   | Summarize the fundamentals of the name server  | 40            |
| 2023-12-27 | Reconnaissance: DNS<br>Service – Basics   | Summarize how the DNS service operates   | 40            |
| 2023-12-27 | Cyber Kill Chain: Ep.9 –<br>Adversary Simulation                                | Recall the fundamentals of adversary simulation  | 100           |
| 2023-12-27 | Cyber Kill Chain: Ep.8 –<br>Actions on Objectives<br>Phase                      | Recall the fundamentals of the 'actions on objectives' phase                                   | 40            |
| 2022 12 27 | Cyber Kill Chain: Ep.7 –  | Recall the fundamentals of the command   | 40            |

## **Activity Report Page 45 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2023-12-27 | Cyber Kill Chain: Ep.6 –<br>Installation/Persistence<br>Phase | Recall the fundamentals of the installation phase            | 40            |
| 2023-12-27 | Cyber Kill Chain: Ep.5 –<br>Exploitation Phase                | Be able to recall the fundamentals of the exploitation phase | 40            |
| 2023-12-27 | Cyber Kill Chain: Ep.4 –<br>Delivery Phase                    | Recall the fundamentals of the delivery phase                | 40            |
| 2023-12-27 | Cyber Kill Chain: Ep.3 –<br>Weaponization Phase               | Recall the fundamentals of the weaponization phase           | 40            |
| 2023-12-27 | Cyber Kill Chain: Ep.2 –<br>Reconnaissance Phase              | Recall the fundamentals of the reconnaissance phase          | 20            |
| 2023-12-27 | Cyber Kill Chain: Ep.1 –<br>What is the Cyber Kill<br>Chain?  | Recognize the fundamentals of the Cyber<br>Kill Chain model  | 20            |
| 2023-12-27 | Secure Fundamentals:<br>The CIA Triad                         | Define confidentiality, integrity, and availability          | 20            |
| 2023-12-27 | Secure Fundamentals:<br>Attribution and<br>Accountability     | Recall the definitions of attribution and accountability     | 20            |
| 2023-12-27 | TLS Fundamentals: Ep.5 – X.509 Introduction                   | Identify an X.509 certificate and its main purpose           | 40            |
| 2023-12-27 | TLS Fundamentals: Ep.4  – Key Exchange and Session Resumes    | Describe the role of the key exchange in a TLS handshake     | 40            |
| 2023-12-27 | TLS Fundamentals: Ep.3 – Cipher Suites                        | Describe the different sections of a TLS cipher suite        | 100           |
| 2023-12-27 | TLS Fundamentals: Ep.2  – Client Hello and Server Hello       | Recall the different features in the client and server hello | 40            |
| 2023-12-27 | TLS Fundamentals: Ep.1 – Introduction                         | Describe the function and purpose of TLS                     | 40            |
| 2023-12-27 | Introduction to<br>Networking: Ep.4 –<br>Network Topologies   | Recognize network topologies                                 | 40            |
| 2023-12-27 | Introduction to<br>Networking: Ep.3 —<br>Network Hardware     | Recognize the different types of hardware used for networks  | 40            |

## **Activity Report Page 46 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2023-12-27 | Introduction to<br>Networking: Ep.2 –<br>Types of Networks  | Recall multiple types of networks and how they differ                          | 20            |
| 2023-12-27 | Introduction to Networking: Ep.1 — What is a Network?       | Recognize networks and their components  | 40            |
| 2023-12-27 | Secure Fundamentals:<br>Least Privileges                    | Be able to describe the principle of least privileges                          | 10            |
| 2023-12-27 | Secure Fundamentals:<br>Defense in Depth                    | Describe the security concept of defense in depth                              | 10            |
| 2023-12-27 | Secure Fundamentals:<br>Security Patching                   | Describe what a security patch is  | 10            |
| 2023-12-27 | Ethics & Laws: US<br>Federal Cyber Law                      | Identify the main US federal laws that can be used to convict cyber criminals  | 10            |
| 2023-12-27 | Compliance: The Sarbanes-Oxley Act                          | Explain the purpose of the Sarbanes-<br>Oxley Act                              | 10            |
| 2023-12-27 | Secure Fundamentals:<br>Authorization                       | Describe the security concept of authorization                                 | 10            |
| 2023-12-27 | Secure Fundamentals:<br>Authentication                      | Describe the security concept of authentication                                | 10            |
| 2023-12-27 | Compliance: EU-US<br>Privacy Shield                         | Recall what the Privacy Shield is  | 10            |
| 2023-12-27 | Ethics & Laws: UK Cyber<br>Law                              | Demonstrate an understanding of illegalities and breaches of law               | 40            |
| 2023-12-27 | Compliance: General<br>Data Protection<br>Regulation (GDPR) | Recognize the key details of the GDPR  | 10            |
| 2023-12-27 | Compliance: Cyber Insurance                                 | Identify what cyber insurance is and what it can cover                         | 10            |
| 2023-12-27 | ISO 27001: Ep.1 – What Is ISO 27001?                        | Identify why the ISO 27001 standard is used                                    | 20            |
| 2023-12-27 | Ethics & Laws:<br>Bugbusters                                | Demonstrate an understanding of bug bounties and the companies that offer them | 40            |

## **Activity Report Page 47 of 77**

| Date       | Lab  | Description   | Points Earned |
|------------|--|---|---------------|
| 2023-12-27 | Ethics & Laws: Ethical and Unethical Hacking                               | Demonstrate the ability to determine the ethical choices of hackers   | 40            |
| 2023-12-27 | Ethics & Laws: Burglary and Hacking  | Demonstrate an understanding of how hacking can be similar to burglary  | 40            |
| 2023-12-27 | Ethics & Laws: Police<br>Raid  | Demonstrate an understanding of devices that would be confiscated in an investigation                               | 40            |
| 2023-12-26 | Al: Prompt Injection<br>Attacks  | Explain the concept of Large Language<br>Models (LLMs) and prompts within the<br>context of artificial intelligence | 200           |
| 2023-12-26 | Al: Demonstrate Your<br>Skills   | Demonstrate the skills acquired through the Al Fundamentals collection  | 100           |
| 2023-12-26 | Al: Image Classification   | Outline what image recognition is and how it's used in artificial intelligence                                      | 40            |
| 2023-12-26 | Al: Generative Al Models   | Understand the basic concepts and types of generative Al  | 20            |
| 2023-12-26 | Al: Artificial Intelligence for Incident Responders                        | Outline the risks and opportunities of Al in incident response, including what threats it poses                     | 20            |
| 2023-12-26 | Events & Breaches:<br>Phishing Fraud                                       | Identify spoofed domains used in phishing emails  | 100           |
| 2023-12-22 | Human Factors in Cybersecurity: Demonstrate Your Understanding             | Demonstrate your understanding of human factors in cybersecurity  | 40            |
| 2023-12-22 | Human Factors in Cybersecurity: Security Awareness and Behavior Change     | Explain the role of security awareness and behavior change  | 20            |
| 2023-12-22 | Human Factors in Cybersecurity: Security Culture                           | Explain the importance of security culture and how the principles apply to your organization                        | 20            |
| 2023-12-22 | Human Factors in<br>Cybersecurity: Usable<br>Security                      | Explain usability and the causes of unusable security   | 20            |
| 2023-12-22 | Human Factors in<br>Cybersecurity: How<br>People Make Security<br>Mistakes | Explain the Swiss Cheese Model applied to cybersecurity   | 20            |
| 2023-12-22 | Human Factors in<br>Cybersecurity: People<br>Are The Strongest Link        | Explain what human factors are and why they're important  | 20            |

## **Activity Report Page 48 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2023-12-22 | Digital Footprint: Ep.4 –<br>Demonstrate Your<br>Knowledge              | Demonstrate an understanding of what digital footprints are  | 10            |
| 2023-12-22 | Digital Footprint: Ep.3 – Protecting Yourself                           | Recognize the different methods that can be used to uncover your digital footprint   | 10            |
| 2023-12-22 | Digital Footprint: Ep.2 –<br>Case Studies                               | Recall key facts about case studies involving digital footprints   | 10            |
| 2023-12-22 | Digital Footprint: Ep.1 –<br>What is a Digital<br>Footprint?            | Recognize the concept of digital footprints and their significance   | 10            |
| 2023-12-22 | Physical Security: Ep.4 –<br>Demonstrate Your<br>Knowledge              | Demonstrate your knowledge on physical security  | 10            |
| 2023-12-22 | Physical Security: Ep.3 –<br>Physical Security When<br>Working Remotely | Recognize physical security risks when working remotely  | 10            |
| 2023-12-22 | Physical Security: Ep.2 –<br>Physical Security in Your<br>Workplace     | Recognize physical security risks in the office  | 10            |
| 2023-12-22 | Physical Security: Ep.1 –<br>Introduction to Physical<br>Security       | Describe what physical security is   | 10            |
| 2023-12-22 | Windows Concepts:<br>Demonstrate Your Skills                            | Demonstrate proficiency in navigating and manipulating the Windows registry to achieve specific configurations or extract information. | 200           |
| 2023-12-22 | Social Engineering: Ep.5  – Demonstrate Your Skills                     | Demonstrate your understanding of social engineering   | 10            |
| 2023-12-22 | Social Engineering: Ep.4 – Protecting Yourself                          | Understand the different ways that you can protect yourself from social engineering  | 10            |
| 2023-12-22 | Social Engineering: Ep.3 – How Is It Used?                              | Recall key facts about notable social engineering attacks  | 10            |
| 2023-12-22 | Social Engineering: Ep.2  – Techniques                                  | Understand the common techniques used in social engineering  | 10            |
| 2023-12-22 | Social Engineering: Ep.1  – What is Social Engineering?                 | Understand what social engineering is  | 10            |
| 2023-12-22 | Al for Business: Ep.4 –<br>Using Al at Work                             | Identify how AI can be used in your day-<br>to-day work  | 10            |

## **Activity Report Page 49 of 77**

| Date       | Lab  | Description   | Points Earned |
|------------|--|---|---------------|
| 2023-12-22 | Al for Business: Ep.3 –<br>The Risks of Al                       | Define some of the risks associated with the use of Al                              | 10            |
| 2023-12-22 | Al for Business: Ep.2 –<br>The Benefits of Al                    | Define some of the benefits associated with the use of Al                           | 10            |
| 2023-12-22 | Al for Business: Ep.1 –<br>What is Al?                           | Understand what AI is and what it can be used for                                   | 10            |
| 2023-12-22 | Al: TensorFlow for Machine Learning                              | Define machine learning   | 40            |
| 2023-12-22 | Al: Introduction to Al   | Define the key components of Al   | 20            |
| 2023-12-22 | Al: Emerging Threats   | Define some of the threats associated with AI                                       | 20            |
| 2023-12-22 | Al: Data Ethics and<br>Responsible Use                           | Define some of the risks associated with data that is collected and processed by AI | 20            |
| 2023-12-22 | Data Privacy: Ep.3 –<br>What About You?                          | Outline why data privacy is important   | 20            |
| 2023-12-22 | Data Privacy: Ep.2 – Data<br>Privacy Regulations                 | Summarize what data privacy regulations are   | 20            |
| 2023-12-22 | Data Privacy: Ep.1 – Key<br>Concepts                             | Explain the key concepts of data privacy  | 10            |
| 2023-12-22 | Windows Concepts:<br>Volume Shadow Copy<br>Service               | Exposure to VSS and its functionality   | 200           |
| 2023-12-22 | Windows Concepts:<br>Alternate Data Streams                      | Exposure to ADS and data hiding   | 200           |
| 2023-12-22 | Windows Concepts:<br>Security Policies                           | Exposure to Windows policy mechanisms   | 200           |
| 2023-12-22 | Windows Concepts:<br>Environment Variables                       | Exposure to Windows environment variables   | 200           |
| 2023-12-21 | Introduction to Digital<br>Forensics: Demonstrate<br>Your Skills | Recognize the fundamentals of digital forensics                                     | 100           |

## **Activity Report Page 50 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2023-12-21 | Introduction to Cryptography: Demonstrate Your Knowledge | Demonstrate an understanding of cryptography                       | 40            |
| 2023-12-21 | Digital Forensics<br>Process: Reporting                  | Recall the different ways of presenting evidence                   | 20            |
| 2023-12-21 | Digital Forensics Tools                                  | Recognize the most common digital forensics tools                  | 20            |
| 2023-12-21 | Digital Forensics<br>Processes and<br>Techniques         | Recall digital forensics processes                                 | 40            |
| 2023-12-21 | Digital Evidence   | Define what digital evidence is                                    | 20            |
| 2023-12-21 | What is Digital Forensics?                               | Define digital forensics   | 20            |
| 2023-12-21 | Encoding: Demonstrate<br>Your Skills                     | Recall encoding methods and techniques                             | 200           |
| 2023-12-21 | Encoding: Punycode                                       | Recall how Punycode functions                                      | 100           |
| 2023-12-21 | Encoding: Unicode  | Recall how Unicode functions                                       | 40            |
| 2023-12-21 | Encoding: Base64   | Recall how Base64 encoding works                                   | 40            |
| 2023-12-21 | Encoding: ASCII  | Recall how ASCII encoding functions                                | 40            |
| 2023-12-21 | Encoding: Hexadecimal                                    | Recall how hexadecimal functions                                   | 40            |
| 2023-12-21 | Encoding: What is Encoding?                              | Recall how encoding functions                                      | 40            |
| 2023-12-21 | Vigenère Ciphers   | Describe what a Vigenère cipher is                                 | 40            |
| 2023-12-21 | The History of Encryption                                | Recall the different methods of encryption used throughout history | 40            |

## **Activity Report Page 51 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2023-12-21 | Introduction to<br>Cryptography: Block<br>Ciphers             | Define a block cipher  | 40            |
| 2023-12-21 | Introduction to Cryptography: Digital Signatures              | Recall the importance of digital signatures                  | 40            |
| 2023-12-21 | Introduction to<br>Cryptography: Hashing                      | Recognize the importance of hashing                          | 20            |
| 2023-12-21 | Introduction to<br>Cryptography: Public<br>Key Infrastructure | Define what public key infrastructure is                     | 40            |
| 2023-12-21 | Networking:<br>Demonstrate Your Skills                        | Demonstrate how to analyze PCAP files                        | 100           |
| 2023-12-21 | Networking:<br>Demonstrate Your<br>Knowledge                  | Demonstrate your networking knowledge                        | 100           |
| 2023-12-21 | DoS Primer: Resource<br>Exhaustion                            | Explain the different types of resource exhaustion attacks   | 40            |
| 2023-12-21 | DoS Primer:<br>Vulnerabilities                                | Learn different types of denial of service vulnerabilities   | 40            |
| 2023-12-21 | DoS Primer: Volumetric  | Explain the different types of volumetric attacks            | 40            |
| 2023-12-21 | Historic Encryption:<br>Demonstrate Your Skills               | Demonstrate your knowledge of historic encryption techniques | 200           |
| 2023-12-21 | Protocols: DHCPv6   | Discuss the use of DHCP in computer networks                 | 200           |
| 2023-12-21 | Protocols: DHCPv4   | Discuss the use of DHCP in computer networks                 | 200           |
| 2023-12-21 | Protocols: Modbus   | Reference the core concepts of the Modbus protocol           | 300           |
| 2023-12-21 | DoS Primer: Practical   | Describe how denial of service attacks appear                | 200           |
| 2023-12-21 | Protocols: DNS  | Describe the structure of DNS requests and responses         | 200           |

## **Activity Report Page 52 of 77**

| Date       | Lab   | Description   | Points Earned |
|------------|---|---|---------------|
| 2023-12-21 | Protocols: SMTP   | Describe the structure of SMTP messages   | 200           |
| 2023-12-21 | Protocols: HTTP   | Describe the structure of HTTP GET and POST requests  | 200           |
| 2023-12-21 | Steganography   | Analyze images and extract information using ExifTool and Steghide                            | 200           |
| 2023-12-20 | OWASP 2021: Ep.11 –<br>Demonstrate Your<br>Knowledge              | Recall different vulnerability categories in the 2021 OWASP Top 10                            | 40            |
| 2023-12-20 | Eric Zimmerman's Tools:<br>Introduction                           | Recall what Eric Zimmerman's tools are and where to download them                             | 40            |
| 2023-12-20 | OWASP API Security Top<br>10                                      | Identify each of the vulnerabilities in OWASP's top 10 APIs                                   | 20            |
| 2023-12-20 | OWASP 2021: Ep.10 –<br>Server-Side Request<br>Forgery             | Summarize server-side request forgery and its relationship to the OWASP Top 10                | 20            |
| 2023-12-20 | Introduction to Cryptography: Public and Private Key Management   | Recognize the importance of managing public and private keys                                  | 40            |
| 2023-12-20 | Introduction to Cryptography: One-Time Pad                        | Define what a one-time pad cipher is  | 40            |
| 2023-12-20 | Introduction to Cryptography: Symmetric Key Encryption            | Recognize symmetric encryption  | 40            |
| 2023-12-20 | Introduction to Cryptography: What is Cryptography?               | Recall the fundamentals of cryptography   | 40            |
| 2023-12-20 | Introduction to Cryptography: Asymmetric Encryption               | Define asymmetric encryption  | 40            |
| 2023-12-20 | Introduction to Cryptography: Stream Ciphers                      | Define stream ciphers and recall their fundamental characteristics                            | 40            |
| 2023-12-20 | Introduction to Cryptography: Message Integrity                   | Be able to define the term 'message integrity'  | 40            |
| 2023-12-19 | OWASP 2021: Ep.9 –<br>Security Logging and<br>Monitoring Failures | Summarize security logging and monitoring failures and their relationship to the OWASP Top 10 | 20            |

## **Activity Report Page 53 of 77**

| Date       | Lab   | Description   | Points Earned |
|------------|---|---|---------------|
| 2023-12-19 | OWASP 2021: Ep.8 –<br>Software and Data<br>Integrity Failures       | Summarize software and data integrity failures and their relationship to the OWASP Top 10       | 20            |
| 2023-12-19 | OWASP 2021: Ep.7 –<br>Identification and<br>Authentication Failures | Summarize identification and authentication failures and their relationship to the OWASP Top 10 | 20            |
| 2023-12-19 | OWASP 2021: Ep.6 –<br>Vulnerable and Outdated<br>Components         | Summarize the security misconfiguration and its relationship to the OWASP Top 10                | 20            |
| 2023-12-19 | OWASP 2021: Ep.5 –<br>Security<br>Misconfiguration                  | Summarize security misconfiguration and its relationship to the OWASP Top 10                    | 20            |
| 2023-12-19 | OWASP 2021: Ep.4 –<br>Insecure Design                               | Summarize insecure design and its relationship to the OWASP Top 10 list                         | 20            |
| 2023-12-19 | OWASP 2021: Ep.2 –<br>Cryptographic Failures                        | Summarize cryptographic failures and their relationship to the OWASP Top 10                     | 20            |
| 2023-12-19 | OWASP 2021: Ep.1 –<br>Broken Access Control                         | Summarize broken access control and its relationship to the OWASP Top 10                        | 20            |
| 2023-12-19 | Omnipotent Productions:<br>Ep.1 – Log Analysis                      | Examine Wireshark's analytics features  | 40            |
| 2023-12-19 | Cyber Kill Chain:<br>Reconnaissance                                 | Recognize the fundamentals of the reconnaissance phase  | 200           |
| 2023-12-18 | Kate's Story: Ep.2 –<br>Exploitation                                | Demonstrate how to analyze a malicious payload  | 300           |
| 2023-12-18 | Immersive Care: Ep.3 –<br>Binary File Analysis                      | Develop critical thinking   | 200           |
| 2023-12-18 | Immersive Care: Ep.2 –<br>Packet Capture Analysis                   | Develop critical thinking   | 200           |
| 2023-12-18 | Immersive Care: Ep.1 –<br>Introduction                              | Develop critical thinking   | 40            |
| 2023-12-15 | CVE-2019-16759<br>(vBulletin RCE)                                   | Analyze the vBulletin vulnerability   | 100           |
| 2023-12-13 | Wizard Spider DFIR: Ep.1 – What is Wizard Spider?                   | Describe the most common TTPs used by Wizard Spider   | 40            |

## **Activity Report Page 54 of 77**

| Date       | Lab  | Description   | Points Earned |
|------------|--|---|---------------|
| 2023-12-13 | Parellus Power: Ep.3 –<br>Exploiting a Web<br>Application Part 2 | Identify the attack surface of a given website  | 300           |
| 2023-12-08 | Parellus Power: Ep.2 –<br>Exploiting a Web<br>Application Part 1 | Identify flaws in a web application   | 200           |
| 2023-12-08 | Parellus Power: Ep.1 –<br>Gathering Information                  | Identify OSINT techniques   | 100           |
| 2023-12-08 | Scanning: WPScan   | Identify vulnerabilities in WordPress   | 200           |
| 2023-12-08 | Scanning: Nikto and DIRB   | Identify vulnerabilities in web servers   | 100           |
| 2023-12-08 | Scanning: Port Knocking  | Practice port knocking to enable services   | 200           |
| 2023-12-08 | Scanning: DNS<br>Enumeration                                     | Knowledge of DNS enumeration techniques   | 200           |
| 2023-12-07 | Ghidra: Ep.1 – Projects<br>and Getting Started                   | Demonstrate the extensive use of disassembly with the Ghidra reverse engineering tool | 300           |
| 2023-12-05 | Introduction to Detection<br>Engineering: Ep.1 –<br>Fundamentals | Recall how the Pyramid of Pain can be applied to defensive operations                 | 40            |
| 2023-12-05 | Autopsy: Ep.3 – Tags,<br>Comments, and Reports                   | Outline how Autopsy can be used to tag, comment, and report on evidence and artifacts | 40            |
| 2023-12-05 | Autopsy: Ep.2 – Cases and Data                                   | Demonstrate how to navigate around an Autopsy case                                    | 40            |
| 2023-12-05 | Autopsy: Ep.1 – Getting<br>Started                               | Demonstrate how to navigate and identify components of Autopsy                        | 100           |
| 2023-12-04 | Hafnium: Detection of IoCs                                       | Be able to use scripts to detect IoCs   | 100           |
| 2023-12-04 | HTTP Status Codes:<br>Challenge                                  | Develop your knowledge of HTTP status codes   | 200           |
| 2023-12-02 | Cross-Site Scripting:<br>Ep.1 – What is Cross-Site<br>Scripting? | Describe what cross-site scripting is   | 20            |

## **Activity Report Page 55 of 77**

| Date       | Lab   | Description   | Points Earned |
|------------|---|---|---------------|
| 2023-12-02 | Cross-Site Scripting:<br>Ep.3 – Stored XSS              | Identify stored cross-site scripting vulnerabilities in a web application                                     | 200           |
| 2023-12-01 | CVE-2023-34362<br>(MOVEit SQL Injection) –<br>Defensive | Outline how attackers are able to exploit a SQL injection vulnerability in MOVEit Transfer to exfiltrate data | 200           |
| 2023-07-10 | Port Identification                                     | Recognize common default port numbers and their associated services   | 100           |
| 2023-06-14 | A Christmas<br>Catastrophe: Kringle Inc.                | Decode common encoding and encryption schemes   | 300           |
| 2023-05-12 | Threat Research: iOS<br>Implant                         | Identify command and control functions used by the implant  | 300           |
| 2023-05-12 | Packet Analysis: Using tcpdump                          | Analyze network packet captures   | 200           |
| 2023-05-10 | Decompiling .NET  | Familiarisation with .NET   | 400           |
| 2023-05-09 | Introduction to Computer Memory and Architecture        | Gain a high level understanding of how memory works in a computer system                                      | 40            |
| 2023-04-21 | Burp Suite Basics:<br>HTTPS                             | Configure and use Burp Suite with Firefox   | 100           |
| 2023-04-20 | Hunting for Public S3<br>Buckets                        | Explain why public S3 buckets are often compromised   | 200           |
| 2023-04-17 | AWS: Introduction to<br>Security Groups                 | Analyze security configuration  | 40            |
| 2023-04-11 | Python Coding –<br>Introduction                         | Read Python code  | 100           |
| 2023-04-11 | Msfvenom  | Use msfvenom to create a payload  | 300           |
| 2023-04-11 | Intro to Web App<br>Hacking: Directory<br>Traversal     | Conduct directory traversal attacks against a web server  | 200           |
| 2023-04-07 | Offensive PowerShell:<br>Ep.7 – Empire                  | Demonstrate how to configure and run various PowerShell Empire functions                                      | 100           |

## **Activity Report Page 56 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2023-04-06 | Incident Response:<br>Suspicious Email – Part 3                              | Investigate host-based compromise and IOCs                     | 400           |
| 2023-03-31 | Compliance: Payment<br>Card Industry Data<br>Security Standard (PCI-<br>DSS) | Recall the different PCI-DSS control objectives                | 40            |
| 2023-03-09 | Container Hardening:<br>Introduction to<br>Containerization                  | Describe containers, their advantages, and disadvantages       | 20            |
| 2023-03-09 | Msfconsole: Exploit  | Practice using Metasploit's exploit modules to attack services | 200           |
| 2023-03-08 | IoT & Embedded<br>Devices: Supply Chain<br>Hardware Tampering                | Practice interacting with a Baseboard<br>Management Controller | 100           |
| 2023-02-24 | World Cup Special:<br>World Cup Trivia                                       | Complete the trivia challenge with minimal guidance            | 300           |
| 2023-02-24 | Splunk: Event Analysis 2   | Demonstrate and develop event log analysis techniques          | 200           |
| 2023-02-24 | WannaCry   | Safely observe WannaCry ransomware                             | 100           |
| 2023-02-24 | Splunk: Event Analysis   | Demonstrate and develop basic event log analysis techniques    | 200           |
| 2023-02-22 | Windows Sysinternals:<br>Sysmon  | Analyze and investigate system logs                            | 100           |
| 2023-02-17 | The Bombe Machine  | Recognize how the Bombe machine works                          | 200           |
| 2023-02-17 | Immersive Bank: Ep.2 –<br>Gaining Access                                     | Apply critical thinking to gain access to the computer         | 100           |
| 2023-02-14 | Infrastructure Hacking:<br>OpenLDAP Plaintext<br>Passwords                   | Analyze an LDAP post exploitation technique                    | 100           |
| 2023-02-14 | Infrastructure Hacking:<br>Space After Filename                              | Inspect suspicious files and analyze their function            | 100           |
| 2023-02-14 | Infrastructure Hacking:<br>SimpleHTTPServer                                  | Use Python's SimpleHTTPServer to spawn web servers             | 100           |

## **Activity Report Page 57 of 77**

| Date       | Lab  | Description   | Points Earned |
|------------|--|---|---------------|
| 2023-02-14 | Infrastructure Hacking:<br>SSL Scanning  | Identify weak cryptographic ciphers   | 200           |
| 2023-02-14 | Infrastructure Hacking:<br>Pass-the-Hash   | Perform a Pass-the-Hash attack on a vulnerable server                           | 200           |
| 2023-02-14 | Netcat: Ep.1 –<br>Connecting with Netcat   | Use Netcat for various tasks  | 100           |
| 2023-02-10 | Compliance: Payment<br>Services Directive 2<br>(PSD2)                            | Describe how PSD2 works and affects the banking industry                        | 10            |
| 2023-02-10 | NIST Cybersecurity<br>Framework  | List the three main components of the NIST Cybersecurity Framework              | 40            |
| 2023-02-10 | Compliance: Information<br>Technology Health<br>Check (ITHC)                     | Recognize why an information technology health check is carried out             | 20            |
| 2023-02-10 | Compliance: Health<br>Insurance Portability and<br>Accountability Act<br>(HIPAA) | Describe the five titles that form the structure of HIPAA                       | 20            |
| 2023-02-10 | Three Lines of Defense   | Describe the Three Lines of Defense model                                       | 10            |
| 2023-02-10 | Qualitative Risk<br>Measurement  | Summarize what qualitative risk is  | 20            |
| 2023-02-10 | Risk and Control Self<br>Assessment (RCSA)                                       | Describe the purpose of an RCSA within the wider risk management framework      | 20            |
| 2023-02-10 | Quantitative Risk<br>Measurement   | Calculate quantitative risk as a function of impact and probability             | 40            |
| 2023-02-10 | Inherent and Residual<br>Risk  | Explain the difference between inherent and residual risk                       | 20            |
| 2023-02-10 | Compliance: Networks<br>and Information Systems<br>(NIS) Directive               | Recognize what the NIS Directive is and how it protects the countries in the EU | 20            |
| 2023-02-10 | Vulnerability<br>Identification  | Identify the different ways to conduct vulnerability identification             | 40            |
| 2023-02-10 | Risk: Asset Inventory and Valuation  | Define the asset identification and valuation processes                         | 20            |

## **Activity Report Page 58 of 77**

| Date       | Lab  | Description   | Points Earned |
|------------|--|---|---------------|
| 2023-02-10 | Compliance: The Cyber<br>Essentials Scheme                             | Identify the most common attacks outlined by the Cyber Essentials scheme                  | 20            |
| 2023-02-10 | How to Mitigate Risk   | Explain how risk management can help mitigate risk  | 20            |
| 2023-02-10 | GDPR Aware   | Explain the key details and impact of GDPR  | 10            |
| 2023-02-09 | Intro to Web App<br>Hacking: Bypassing<br>HTTP Client-Side<br>Controls | Recognize some common insecure user access controls that can be found in web applications | 200           |
| 2023-02-09 | Intro to Web App<br>Hacking: Page Source<br>Review                     | Analyze the web application source code to recognize technologies being used              | 200           |
| 2023-02-08 | PoshC2: Ep.1 – Introduction to Command and Control Frameworks          | Describe command and control frameworks, their uses, and benefits                         | 40            |
| 2023-02-08 | Elastic Playground:<br>Accounting and Audit                            | Identify audit and accounting methodology   | 200           |
| 2023-02-08 | IoT & Embedded<br>Devices: Best Practice                               | Describe how to securely deploy IoT devices   | 10            |
| 2023-02-08 | IoT & Embedded Devices: Hardware Reverse Engineering                   | Identify security best practices for IoT devices  | 10            |
| 2023-02-08 | loT and Embedded<br>Devices: Network<br>Protocols and Security         | Express the importance of using encryption to secure communications                       | 10            |
| 2023-02-08 | loT & Embedded<br>Devices: Security Issues                             | Identify security best practice for IoT devices   | 10            |
| 2023-02-03 | Ransomware: Bad Rabbit   | Identify signs of Bad Rabbit ransomware infections on a Windows host                      | 300           |
| 2023-02-02 | Incident Response: Data<br>Exfiltration                                | Practice identifying instances where data has been exfiltrated                            | 100           |
| 2023-02-02 | Incident Response:<br>Clipboard Data Theft                             | Analyze techniques used by adversaries to steal clipboard data                            | 100           |
| 2023-01-31 | Infrastructure Hacking:<br>Sudo Caching                                | Identify exploit attempts that abuse the sudo caching technique                           | 100           |

## **Activity Report Page 59 of 77**

| Date       | Lab   | Description   | Points Earned |
|------------|---|---|---------------|
| 2023-01-31 | Practical Malware<br>Analysis: Java RATs                      | Identify the file structure for a JAR application                         | 200           |
| 2023-01-31 | Infrastructure Hacking:<br>Bash History                       | Be able to identify the risk of passing credentials with the command line | 100           |
| 2023-01-31 | How is Risk Measured?   | Be able to describe risk, impact, and probability                         | 40            |
| 2023-01-31 | Digital Forensics: Using file                                 | Using file to identify true information about unusual looking files       | 100           |
| 2023-01-31 | Digital Forensics:<br>Timestomping                            | Gain an understanding of the MFT  | 300           |
| 2023-01-31 | Digital Forensics: National Software Reference Library (NSRL) | Use the national software reference library                               | 100           |
| 2023-01-31 | SMTP Log Analysis   | Carry out a log analysis to identify particular information               | 100           |
| 2023-01-31 | Log Finder  | Perform web log analysis  | 100           |
| 2023-01-31 | Packet Analysis: Packet<br>Capture Basics                     | Analyze network packet captures   | 100           |
| 2023-01-30 | PowerShell Basics: Ep.5  – Files and Folders                  | Explain how to navigate around a system with PowerShell                   | 100           |
| 2023-01-30 | Introduction to Forensics                                     | Exposure to forensics principals  | 40            |
| 2023-01-27 | Practical Malware<br>Analysis: Static Analysis                | Describe what static analysis is and how it's used for malware analysis   | 40            |
| 2023-01-26 | Windows Sysinternals:<br>Process Explorer                     | Use Process Explorer effectively  | 100           |
| 2023-01-25 | Windows Sysinternals:<br>Introduction to<br>Sysinternals      | Identify products in the Sysinternals Suite                               | 100           |
| 2023-01-25 | PowerShell Basics: Ep.1 – What is PowerShell?                 | Describe what PowerShell is   | 100           |

## **Activity Report Page 60 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2023-01-23 | Mimikatz and Chrome<br>Passwords                                 | Recall the cookies and login data files that Chrome stores in %LOCALAPPDATA%                       | 200           |
| 2023-01-23 | Cross-Site Scripting:<br>Ep.2 – Reflected XSS                    | Identify reflected cross-site scripting vulnerabilities in a web application                       | 200           |
| 2023-01-23 | SQL Injection: sqlmap  | Practice applying sqlmap to a database   | 200           |
| 2023-01-23 | Credential Access: Using<br>Hydra                                | Perform attacks on different network protocols   | 200           |
| 2023-01-23 | Open Source Intelligence<br>(OSINT): Social Media                | Demonstrate the use of OSINT techniques to identify useful information from social media platforms | 40            |
| 2023-01-23 | John the Ripper  | Exposure to John the Ripper tool chain   | 100           |
| 2023-01-23 | Introduction to ELF<br>Reverse Engineering                       | Exposure to ELF binary analysis  | 100           |
| 2023-01-23 | Credential Access:<br>Password Hashing and<br>Salting Techniques | Describe the benefits of salting passwords   | 100           |
| 2023-01-20 | SQL: An Introduction   | Gain an understanding of the SQL language and queries  | 100           |
| 2023-01-13 | Virtualization   | Describe the uses and advantages of virtualization   | 10            |
| 2023-01-13 | Platform as a Service (PaaS)                                     | Be able to explain the advantages and disadvantages of Platform as a Service                       | 20            |
| 2023-01-13 | Security Automation  | Describe the advantages of security automation and orchestration                                   | 20            |
| 2023-01-13 | Infrastructure as Code (IaC)                                     | Explain what IaC is and how it is deployed   | 20            |
| 2023-01-13 | DevSecOps: Introduction  | Recall the evolution of software delivery methodologies  | 10            |
| 2023-01-13 | Infrastructure as a<br>Service (IaaS)                            | Describe the advantages and disadvantages of Infrastructure as a Service (IaaS)                    | 20            |

## **Activity Report Page 61 of 77**

| Date       | Lab   | Description   | Points Earned |
|------------|---|---|---------------|
| 2023-01-13 | Software as a Service (SaaS)  | Be able to describe the advantages and disadvantages of SaaS                        | 20            |
| 2023-01-13 | MongoDB: An<br>Introduction   | A basic understanding of NoSQL<br>Databases   | 100           |
| 2023-01-13 | Linux CLI: Ep.14 – Using<br>Screen  | Describe how `screen` works in the CLI  | 100           |
| 2023-01-13 | Linux CLI: Ep.16 –<br>Combining Commands                                    | Identify the different ways of combining commands on the terminal                   | 200           |
| 2023-01-13 | Linux CLI: Ep.15 –<br>Generating File Hashes                                | Recognize file hashes   | 100           |
| 2023-01-12 | Linux CLI: Ep.12 – Using Find   | Recognize how the find command work   | 200           |
| 2023-01-12 | Linux CLI: Ep.13 –<br>Searching and Sorting                                 | Employ searching techniques to find patterns in files                               | 100           |
| 2023-01-12 | Linux CLI: Ep.11 – Using SSH and SCP  | Recall what the SSH protocol is   | 100           |
| 2023-01-04 | World Cup Special: It's a<br>Game of Pong                                   | Develop critical thinking   | 100           |
| 2022-12-30 | Compliance: The NCSC's 10 Steps to Cybersecurity                            | Describe each of the 10 Steps to Cybersecurity                                      | 20            |
| 2022-12-30 | Compliance: Legislation,<br>Regulation, and<br>Standards                    | Describe the differences between compliance, legislation, regulation, and standards | 10            |
| 2022-12-30 | Compliance: Policies,<br>Processes, and<br>Procedures                       | Recall the differences between policies, processes, and procedures                  | 10            |
| 2022-12-30 | Compliance:<br>Accreditation  | Describe the accreditation process  | 10            |
| 2022-12-29 | Digital Forensics Process: Collection – Evidence Acquisition and Protection | Recognize how to protect evidence during collection                                 | 40            |
| 2022-12-29 | Digital Forensics:<br>Windows Image Analysis                                | Investigate and analyze operating systems using common forensic techniques          | 300           |

## **Activity Report Page 62 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2022-12-28 | What Is Risk?                                    | Define the core concepts that formulate risk                             | 20            |
| 2022-12-27 | Protocols: LDAP                                  | Analyze the LDAP protocol in an enterprise context                       | 100           |
| 2022-12-27 | Protocols: ARP                                   | Identify packet structure of ARP requests and responses                  | 100           |
| 2022-12-27 | Stack Overflow                                   | Recall the risks of using code found online                              | 10            |
| 2022-12-27 | Cryptocurrency and<br>Blockchain                 | An introduction to cryptocurrency and blockchain concepts                | 10            |
| 2022-12-27 | Linux CLI: Ep.10 – Using<br>Sudo                 | Identify different user privileges in Linux                              | 100           |
| 2022-12-27 | Defense in Depth                                 | Discover the principles of defense systems                               | 20            |
| 2022-12-27 | Linux CLI: Ep.8 –<br>Manipulating Text           | Modify text within files using basic command line tools                  | 200           |
| 2022-12-27 | Linux CLI: Ep.9 – Stream<br>Redirection          | Describe how data can be manipulated via the terminal                    | 100           |
| 2022-12-27 | Intrusion Detection<br>Systems                   | Recognize what an IDS is and how they're used                            | 20            |
| 2022-12-27 | IoT & Embedded<br>Devices: What Is IoT?          | Recognize IoT devices and their associated risks                         | 10            |
| 2022-12-16 | The Typex Machine                                | Recognize how a Typex machine works                                      | 200           |
| 2022-12-16 | Infrastructure Hacking:<br>XSL Script Processing | Recognize how XSL files can obscure malicious code with embedded scripts | 200           |
| 2022-12-16 | Exploitation Development: Data Compression       | Recognize how data compression can be used to exfiltrate data            | 100           |
| 2022-12-16 | Protocols: HTTP – Status<br>Codes                | Develop knowledge of HTTP status codes                                   | 100           |

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2022-12-16 | Protocols: FTP   | Explain the core concepts of the File<br>Transfer Protocol             | 100           |
| 2022-12-16 | Encryption Tools:<br>CyberChef — Recipes                                 | Recall how CyberChef recipes work                                      | 40            |
| 2022-12-16 | Incident Response:<br>Parsing PST  | Investigate email client files   | 200           |
| 2022-11-22 | Tactics: Defense Evasion   | Recognize the purpose of the MITRE ATT&CK® Defense Evasion tactic      | 20            |
| 2022-11-22 | Tactics: Privilege<br>Escalation   | Recognize the purpose of the MITRE ATT&CK® Privilege Escalation tactic | 20            |
| 2022-11-22 | Tactics: Persistence   | Recognize the purpose of the MITRE ATT&CK® Persistence tactic          | 20            |
| 2022-11-22 | Tactics: Execution   | Know the purpose of the MITRE ATT&CK® Execution tactic                 | 20            |
| 2022-11-22 | Threat Hunting:<br>Analyzing Sandbox<br>Reports                          | Investigate malicious samples using sandbox reports                    | 100           |
| 2022-11-21 | Threat Hunting: STIX   | Locate Cyber Threat Information from within STIX objects               | 40            |
| 2022-11-21 | Threat Hunting:<br>VirusTotal  | Demonstrate how to use malware analysis tools                          | 100           |
| 2022-11-21 | Threat Hunting:<br>Introduction  | Describe threat hunting concepts                                       | 40            |
| 2022-11-21 | Threat Hunting:<br>Honeypots   | Describe what a honeypot is  | 200           |
| 2022-11-18 | Tools Leak — Who is APT34?   | Familiarize yourself with APT34  | 40            |
| 2022-11-10 | Linux CLI: Ep.1 –<br>Introduction to the Linux<br>Command Line Interface | Recall Linux command line fundamentals                                 | 40            |
| 2022-11-10 | Linux CLI: Ep.2 – Getting<br>Started with the<br>Terminal                | Recall fundamental concepts of the Linux terminal                      | 100           |

## **Activity Report Page 64 of 77**

| Date       | Lab  | Description  | Points Earned |
|------------|--|--|---------------|
| 2022-11-10 | Linux CLI: Ep.5 – File<br>Permissions        | Be able to read Linux file permissions                               | 100           |
| 2022-11-10 | Linux CLI: Ep.6 – Editing<br>Files           | Be able to recall some common Linux command line text editors        | 100           |
| 2022-11-10 | Linux CLI: Ep.7 – Using wc                   | Count elements in a file using the wc tool                           | 200           |
| 2022-11-10 | Linux CLI: Ep.4 –<br>Changing Things         | Recall the Linux CLI commands explored in the lab                    | 100           |
| 2022-11-10 | Linux CLI: Ep.3 – Moving<br>Around           | Navigate through directories on the command line                     | 100           |
| 2022-11-08 | The Internet                                 | Explain the history of the internet                                  | 20            |
| 2022-11-08 | Introduction to Encryption                   | Identify different types of encryption algorithms                    | 100           |
| 2022-11-08 | Introduction to Hashing                      | Identify the characteristics of a good hashing algorithm             | 100           |
| 2022-11-08 | OSI Model                                    | Identify the different layers of the OSI model                       | 40            |
| 2022-11-08 | Rainbow Tables                               | Describe what a rainbow table is                                     | 40            |
| 2022-11-08 | Ports  | Identify how ports are used in modern networks                       | 40            |
| 2022-11-08 | Transport Protocols                          | Explain the core concepts of the the most common transport protocols | 40            |
| 2022-11-08 | Internet Protocol V4                         | Explain the core concepts of IPv4 addressing                         | 100           |
| 2022-11-08 | Symmetric vs<br>Asymmetric Key<br>Encryption | Apply symmetric key encryption and decryption techniques             | 100           |
| 2022-11-08 | Modern Encryption: MD5<br>Hashing            | Recall what MD5 hashing is and how it works                          | 100           |

## **Activity Report Page 65 of 77**

| Date       | Lab   | Description  | Points Earned |
|------------|---|--|---------------|
| 2022-11-08 | Modern Encryption:<br>SHA-1 Hashes                              | Recall what SHA-1 hashing is and how it works  | 100           |
| 2022-10-27 | Validating SIEM Results   | Identify whether a SIEM's actions are accurate in any given scenario                       | 40            |
| 2022-10-27 | Burp Suite Basics:<br>Introduction                              | Set up and use Burp Suite with Firefox   | 100           |
| 2022-10-27 | Introduction to Incident<br>Response: Ep.2 –<br>Process         | Recognize and outline the stages of the incident response process                          | 40            |
| 2022-10-27 | Introduction to Incident<br>Response: Ep.1 –<br>Introduction    | Describe what an incident is   | 40            |
| 2022-10-25 | CVE-2019-0708<br>(BlueKeep) – Offensive                         | Exploit BlueKeep   | 200           |
| 2022-10-25 | CVE-2019-0708<br>(BlueKeep: Snort Rule)                         | Apply principles of how security teams may update systems in preparation for known threats | 100           |
| 2022-10-25 | The Enigma Machine  | Recall how the Enigma machine works  | 200           |
| 2022-10-25 | Encryption Tools:<br>CyberChef                                  | Recall how CyberChef functions   | 40            |
| 2022-10-25 | Caesar Ciphers  | Recall how Caesar cipher encoding works  | 40            |
| 2022-10-21 | CVE-2019-17387<br>(Aviatrix VPN Client<br>Privilege Escalation) | Exploit CVE-2019-17387 to escalate privileges  | 200           |
| 2022-10-20 | CVE-2019-1388<br>(Windows Priv Esc UAC<br>Bypass)               | Bypass User Account Controls   | 200           |
| 2022-10-17 | Cyber 101: Rogue USB<br>Devices                                 | Recall how rogue USB devices can be used for malicious purposes                            | 10            |
| 2022-10-17 | Cyber 101: Who Are The Hackers?                                 | Recognize the different types of hackers   | 10            |
| 2022-10-17 | Cyber 101: Why Hackers<br>Hack                                  | Recognize some of the methods used by hackers  | 10            |

#### **About Immersive Labs**

Immersive Labs is the world's first fully interactive, on-demand, and gamified cyber skills platform. Our technology delivers challenge-based assessments and upskilling exercises which are developed by cyber experts with access to the latest threat intelligence. Our unique approach engages users of every level, so all employees can be equipped with critical skills and practical experience in real time.
